Case Studies in Special Education Oct 09 2020 Special education law and practice have undergone profound transformation over the past 50 years. Students with disabilities are now more likely to receive a free and appropriate education in the least restrictive environment possible; however, the ideals of the law have not always been manifested in effective practice. Although special education services are vastly better today than they were in the early years of public education, current policies and practices continue to result in the under-education of many children with disabilities. This book illustrates key failures of the system within the context of real children's experiences. The case study approach gives voice to the students, families, and educators who have been let down by the special education process. The goal is to shed light on the flaws and injustices of the status quo. After identifying these problems, the authors offer sound solutions. Section 1 is devoted to issues surrounding identification of students with learning disabilities. These topics include occurrence of inconsistencies in assessment and diagnoses, understanding the struggles of the "slow learner," and the interference of behavioral challenges with students' educational performance. Section 2 addresses problems within the evaluation process that negatively influence diagnoses. Discussions include disproportionate representation of students from low socioeconomic backgrounds as well as students of color and bilingual students. Section 3 highlights significant concerns with service provision within the special education realm. The narratives throughout the book

present stories of children on the receiving end of a severely fractured special education system. Recommendations focus on solving specific problems, such as inconsistent identification processes and categories, disproportionate representation, ill-conceived IEPs, ineffective specially designed instruction, and poorly implemented RTI programs. The book's methodological approach affirms that there is much room for reform within both the special education system and the public education system as a whole. This book will be an excellent resource for graduate-level students, practitioners, and teachers in the fields of special education, disability studies, early intervention, school psychology, and child and family services. Additionally, it will be of interest to social workers, counselors, and researchers.

Causal Case Study Methods Sep 07 2020 An introduction to causal case study methods, complete with step-by-step guidelines and examples

The Art of Case Study Research Jan 30 2020 The book examines and annotates an actual case study to demonstrate to readers how to resolve some of the major issues of case study research, for example : how the case is selected, how to generalize what is learned from one case to another, and how to interpret data. Other topics covered include : differences between quantitative and qualitative approaches, data-gathering including document review, coding, sorting and pattern analysis, the roles of the researcher, triangulation and reporting a case study.

Leading from the Middle Apr 02 2020 Pity the humble academic. Moving from a faculty position to an administrative office frequently entails gaining considerable responsibility-but ambiguous power. The hope of these two authors is that this volume will serve as a reference and a source of support for current associate and assistant deans and as a window into these jobs for faculty who may be considering such a role. Staff positions often come with detailed job descriptions and reporting lines, but the role of associate/assistant deans is often ill-

defined and dependent upon the personality of the dean they serve. The authors thus begin their discussion with an examination of the relationship between these two positions, setting the tone for the rest of the book. Stone and Coussons-Read have structured as a series of modules that encompass different situations in which associate/assistant deans may find themselves, and the authors candidly give advice about how to handle the resulting challenges. Case studies illustrate the typical daily work required by this position, with each case followed by suggestions for effective responses. The authors also provide references to sources in which readers can dig more deeply into areas such as conflict management and communication styles.

Embedded Case Study Methods May 16 2021 In an embedded case study, the starting and end point is the comprehension of the case as a whole in its real-world context. This book bridges the gap between quantitative and qualitative approaches to complex problems when using this methodology.

[Linking Theory to Practice](#) Aug 07 2020 Framed by an overview of theories that guide student affairs practice, the cases in this book present a challenging array of problems that student affairs and higher education personnel face on campus, such as racial diversity, alcohol abuse, and student activism. The revised edition has new cases reflecting the complexity of today's environment at colleges and universities, including the expanded use of social networking and new technology, the rise in mental health issues, and Title IX issues. An excellent teaching tool, this book challenges students to consider multiple overlapping issues within a single case study.

Case Study Methodology in Higher Education Dec 11 2020 In higher education, case studies can be utilized to have students put themselves into problems faced by a protagonist and, by doing so, address academic or career-related issues. Working through these issues provides students with an opportunity to gain applied perspective and experiences. Professors in higher education who choose this method of teaching require navigational tools to ensure that students achieve stated learning objectives. Case Study Methodology in Higher Education is an essential research publication that focuses on the history and theories relating to case study methodology including techniques for writing case studies and utilizing them in university settings to prepare students for real-life career-related scenarios. This publication features a wide range of topics such as educational leadership, case writing, and teacher education. It is essential for educators, career professionals, higher education faculty, researchers, and students.

A Case for the Case Study Aug 31 2022 Since the end of World War II, social science research has become increasingly quantitative in nature. A Case for the Case Study provides a rationale for an alternative to quantitative research: the close investigation of single instances of social phenomena. The first section of the book contains an overview of the central methodological issues involved in the use of the case study method. Then, well-known scholars describe how they undertook case study research in order to understand changes in church involvement, city life, gender roles, white-collar crimes, family structure, homelessness, and other types of social experience. Each contributor confronts several key questions: What does the case study tell us that other approaches cannot? To what extent can one generalize from the study of a single case or of a highly limited set of cases? Does case study work provide the basis for postulating broad principles of social structure and behavior? The answers vary, but the consensus is that the opportunity to examine certain kinds of social phenomena in depth enables social scientists to advance greatly our empirical understanding of social life. The contributors are Leon Anderson, Howard M. Bahr, Theodore Caplow, Joe R. Feagin, Gilbert Geis, Gerald Handel, Anthony M. Orum, Andree F. Sjoberg, Gideon Sjoberg, David A. Snow, Ted R. Vaughan, R. Stephen Warner, Christine L. Williams, and Norma Williams.

Case Studies on Diversity and Social Justice Education Aug 26 2019 Case Studies on Diversity and Social Justice Education offers pre- and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. The accessibly written cases allow educators to practice the process of considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and sustain equitable learning environments for all students. This revised edition adds ten new cases to offer greater coverage of elementary education, as well as topics such as body-shaming, Black Lives Matter, and transgender oppression. Existing cases have been updated to reflect new societal contexts, and streamlined for ease-of-use. The book begins with a seven-point process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and content areas, allowing significant flexibility in how and with whom they are used. Although organized topically, the intersections of these issues are stressed throughout the cases, reflecting the complexities of real-life scenarios. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called 'Points for Consideration.' This unique feature provides valuable insight for understanding the complexities of each case.

Rethinking Case Study Research Jan 12 2021 Comparative case studies are an effective qualitative tool for researching the impact of policy and practice in various fields of social research, including education. Developed in response to the inadequacy of traditional case study approaches, comparative case studies are highly effective because of their ability to synthesize information across time and space. In Rethinking Case Study Research: A Comparative Approach, the authors describe, explain, and illustrate the horizontal, vertical, and transversal axes of comparative case studies in order to help readers develop their own comparative case study research designs. In six concise chapters, two experts employ geographically distinct case studies—from Tanzania to Guatemala to the U.S.—to show how this innovative approach applies to the operation of policy and practice across multiple social fields. With examples and activities from anthropology, development studies, and policy studies, this volume is written for researchers, especially graduate students, in the fields of education and the interpretive social sciences.

Multiple Case Study Analysis Oct 21 2021 Examining situational complexity is a vital part of social and behavioral science research. This engaging text provides an effective process for studying multiple cases—such as sets of teachers, staff development sessions, or clinics

operating in different locations--within one complex program. The process also can be used to investigate broadly occurring phenomena without programmatic links, such as leadership or sibling rivalry. Readers learn to design, analyze, and report studies that balance common issues across the group of cases with the unique features and context of each case. Three actual case reports from a transnational early childhood program illustrate the author's approach, and helpful reproducible worksheets facilitate multicase recording and analysis.

The Anatomy of the Case Study Jun 16 2021 This sharp, stimulating title provides a structure for thinking about, analysing and designing case study. It explores the historical, theoretical and practical bones of modern case study research, offering to social scientists a framework for understanding and working with this form of inquiry. Using detailed analysis of examples taken from across the social sciences Thomas and Myers set out, and then work through, an intricate typology of case study design to answer questions such as: How is a case study constructed? What are the required, inherent components of case study? Can a coherent structure be applied to this form of inquiry? The book grounds complex theoretical insights in real world research and includes an extended example that has been annotated line by line to take the reader through each step of understanding and conducting research using case study.

Case Studies and Theory Development in the Social Sciences

Nov 09 2020 The use of case studies to build and test theories in political science and the other social sciences has increased in recent years. Many scholars have argued that the social sciences rely too heavily on quantitative research and formal models and have attempted to develop and refine rigorous methods for using case studies. This text presents a comprehensive analysis of research methods using case studies and examines the place of case studies in social science methodology. It argues that case studies, statistical methods, and formal models are complementary rather than competitive. The book explains how to design case study research that will produce results useful to policymakers and emphasizes the importance of developing policy-relevant theories. It offers three major contributions to case study methodology: an emphasis on the importance of within-case analysis, a detailed discussion of process tracing, and development of the concept of typological theories. Case Studies and Theory Development in the Social Sciences will be particularly useful to graduate students and scholars in social science methodology and the philosophy of science, as well as to those designing new research projects, and will contribute greatly to the broader debate about scientific methods.

Case Study Research and Applications Nov 02 2022 The Sixth Edition of Robert K. Yin's bestseller provides a complete portal to the world of case study research. Offering comprehensive coverage of the design and use of the case study method in addition to an integration of applications, the book gives readers access to exemplary case studies drawn from a wide variety of academic and applied fields. The integration of applications will enable users to see more directly how concrete case studies can implement the principles of case study

research methods.

The Case for Case Studies Oct 01 2022 This book seeks to narrow two gaps: first, between the widespread use of case studies and their frequently 'loose' methodological moorings; and second, between the scholarly community advancing methodological frontiers in case study research and the users of case studies in development policy and practice. It draws on the contributors' collective experience at this nexus, but the underlying issues are more broadly relevant to case study researchers and practitioners in all fields. How does one prepare a rigorous case study? When can causal inferences reasonably be drawn from a single case? When and how can policy-makers reasonably presume that a demonstrably successful intervention in one context might generate similarly impressive outcomes elsewhere, or if massively 'scaled up'? No matter their different starting points - disciplinary base, epistemological orientation, sectoral specialization, or practical concerns - readers will find issues of significance for their own field, and others across the social sciences. This title is also available Open Access.

Case Study Methods Nov 29 2019 In this introduction to understanding, researching and doing case studies in the social sciences, Hamel outlines several differing traditions of case study research including the Chicago School of Sociology, the anthropological case studies of Malinowski, and the French La Play school tradition. He shows how each developed, changed and has been practiced over time. Suggestions for the practice of case studies are made for the novice reader and an additional feature is the extensive bibliography on case study methods in social science to allow for further exploration of the topic.

Participatory Case Study Work Jun 24 2019 Participatory Case Study Work shows academic co-researchers how to adapt and implement their methods so that data collection and analysis is authentically participatory. At the heart of this text is advocating a participatory approach to case study work, with co-construction as a catalyst for shared understanding and action in advancing ageing studies. Whilst case study research has a relatively long tradition in the canon of research methodologies, little attention has so far been paid to the importance and value of participatory case study work. This is surprising as its egalitarian and democratic value-base naturally lends itself to the co-production and co-creation of personal and collective theory drawn directly from lived experience. The book brings together over 15 years' worth of participatory case study work in ageing studies in which the editors have been actively involved as either front-line researchers or as supervisors to PhD and MPhil studies adopting the

methodology, and from where each of the contributors are selected. Real-life case examples are shared in the main chapters of the book and they provide direction as to how learning can be applied to other settings. The chapters also contain key references and recommended reading. This volume will appeal to undergraduate and postgraduate students as well as postdoctoral researchers interested in fields such as: Research Methods, Qualitative Methods, Ageing Studies and Mental Health Studies.
