The Premed Playbook Guide to the Medical School Interview Jan 12 2021 The Premed Playbook: Guide to the Medical School Interview is the only book needed to prepare premed students for their medical school interviews. Through interviews with Admissions Committee members and others, Dr. Gray has compiled the most comprehensive book on this subject. Premed students want to know what to expect, but more importantly they need to see examples of what successful applicants have done. The Premed Playbook not only gives them close to 600 potential interview questions, it also gives them real answers and feedback from interview sessions that Dr. Gray has held with students.

Succeeding in Academic Medicine Jun 04 2020 This first-of-its-kind book for underrepresented racial and ethnic minorities (URM), women, and sexual and gender minorities in medicine offers the core knowledge and skills needed to achieve a well-planned, fulfilling career in academic medicine. The knowledge and skills provided by the esteemed co-authors, successful diverse pre-faculty, and junior and senior academicians, are complemented by their inspirational and motivational stories. Increasing diversity in the academic medicine workforce has been identified and embraced as a core value of institutional excellence at nearly all academic institutions and professional associations. Despite this established core value, certain groups such as Black/African-American, Latino/Hispanic, American Indian/Alaska Native-identified individuals, women, and sexual and gender minorities, are still present in lower proportions compared with the general population and lack inclusion. In 12 chapters and with a unique focus on a practical approach to increasing diversity and inclusion in academic medicine, this book demystifies the often-insular world of academic medicine. It comprehensively outlines career opportunities and associated responsibilities, how to transform academic-related work to scholarship, and offers a clear and transparent look into the academic appointment and promotion process. By focusing on the practical steps described in this handy book, students and residents can develop a strong foundation for an academic medicine career and succeed in becoming the next generation of diverse faculty and administrators.

The Official Guide to Medical School Admissions 2018 Jun 16 2021

The Impacts of Racism and Bias on Black People Pursuing Careers in Science, Engineering, and Medicine Sep 07 2020 Despite the changing demographics of the nation and a growing appreciation for diversity and inclusion as drivers of excellence in science, engineering, and medicine, Black Americans are severely underrepresented in these fields. Racism and bias are significant reasons for this disparity, with detrimental implications on individuals, health care organizations, and the nation as a whole. The Roundtable on Black Men and Black Women in Science, Engineering, and Medicine was launched at the National Academies of Sciences, Engineering, and Medicine in 2019 to identify key levers, drivers, and disruptors in government, industry, health care, and higher education where actions can have the most impact on increasing the participation of Black men and Black women in science, medicine, and engineering. On April 16, 2020, the Roundtable convened a workshop to explore the context for their work; to surface key issues and questions that the Roundtable should address in its initial phase; and to reach key stakeholders and constituents. This proceedings provides a record of the workshop.

Accessibility, Inclusion, and Action in Medical Education Feb 10 2021 To capture the current state of disability in medical education, the AAMC and the University of California, San Francisco, School of Medicine partnered to publish a new report drawn from the lived experiences of learners with disabilities. This publication weaves together major themes from interviews with 47 students, residents, and physicians with disabilities to identify cultural and structural barriers and catalyze institutional policies that support all qualified learners, regardless of disability, throughout the medical education continuum. The report highlights key considerations that leaders in academic medicine can implement to increase meaningful access for learners with disabilities, including:

Review Criteria for Research Manuscripts Nov 29 2019 High-quality reviews are vital both for ensuring the excellence of published scholarship and as a way to provide authors with important feedback to use to improve their scholarship. The importance of the reviewer's guide to faculty development cannot be overestimated. This completely updated, expanded second edition is written to support our growing community of medical education scholars. As dissemination of scholarly work in medical education continues to evolve, review guidelines for different types of work are needed. This edition includes new chapters on reporting qualitative findings, reviewing literature reviews, and reviewing reports on innovations. This guide intends to: Familiarize our reviewers with the purposes of review, approaches to or best practices for reviewing, and criteria for superlative research. Help reviewers organize and communicate their recommendations effectively to Academic Medicine and other journals. Help researchers by explaining the criteria used to evaluate their submissions Improve peer review and the quality of published research Peer review is a time-consuming and imperfect process, but can result in a radically improved research report that ultimately has a substantial impact on our thinking about difficult problems. This updated guide will contribute to our efforts to improve peer review and improve the quality of published research.

Wischnitzer's Residency Manual May 16 2021 Residency is a defining period in a physician's life because it is the decisive stage for personal growth, intellectual challenge and emotional stress. It is a major transitional period transforming a medical student into a practice-ready physician. This role-change for the physician-in-training usually takes place in a new setting and necessitates coping with conflicting demands, heavy responsibility and long work hours. Adding to the residents' burden is the ongoing need to manage their financial, social and work demands. This manual was designed to help medical students on this final critical segment of their journey to become practicing physicians. It will enhance the students' awareness of the potential obstacles along the way and provide them with guidance on how to avoid them. The book includes: selecting an appropriate specialty, maximizing the chances of being selected, surviving residency and beginning practice.

Biomedical Graduate School Feb 22 2022 "Biomedical Graduate School: A Planning Guide to the Admissions Process is an indispensable resource for college students aspiring to a PhD or MD-PhD. It helps students identify the structure of advanced degree programs and how these degrees can enhance their potential career options. The book discusses how students can optimize selection of academic courses, research experiences, and extracurricular activities during their undergraduate education to make them more

competitive candidates for graduate and medical school programs. It guides students through the many facets of the admissions process, including criteria for selecting where to apply, how to prepare an application that maximizes their academic credentials, how to prepare for the interview process, how faculty evaluate applicants, and how to utilize a rational process to select a graduate school or medical school that will enable students to meet their academic goals." -- Back cover.

Core Entrustable Professional Activities for Entering Residency Apr 26 2022 This landmark publication published by the AAMC identifies a list of integrated activities to be expected of all M.D. graduates making the transition from medical school to residency. This guide delineates 13 Entrustable Professional Activities (EPAs) that all entering residents should be expected to perform on day 1 of residency without direct supervision regardless of specialty choice. The Core EPAs for Entering Residency are designed to be a subset of all of the graduation requirements of a medical school. Individual schools may have additional mission-specific graduation requirements, and specialties may have specific EPAs that would be required after the student has made the specialty decision but before residency matriculation. The Core EPAs may also be foundational to an EPA for any practicing physician or for specialty-specific EPAs. Update: In August 2014, the AAMC selected ten institutions to join a five-year pilot to test the implementation of the Core Entrustable Professional Activities (EPAs) for Entering Residency. More than 70 institutions, representing over half of the medical schools accredited by the U.S. Liaison Committee on Medical Education (LCME), applied to join the pilot, demonstrating the significant energy and enthusiasm towards closing the gap between expectations and performance for residents on day one. The cohort reflects the breadth and diversity of the applicant pool, and the institutions selected are intended to complement each other through the unique qualities and skills that each team and institution brings to the pilot. Faculty and Learners' Guide (69 pages) - Developing faculty: The EPA descriptions, the expected behaviors, and the vignettes are expected to serve as the foundation for faculty development. Faculty can use this guide as a reference for both feedback and assessment in pre-clinical and clinical settings. - Developing learners: Learners can also use this document to understand the core of what is expected of them by the time they graduate. The EPA descriptions themselves delineate the expectations, while the developmental progression laid out from pre-entrustable to entrustable behaviors can serve as the roadmap for achieving them.

In the Nation's Compelling Interest Mar 14 2021 The United States is rapidly transforming into one of the most racially and ethnically diverse nations in the world. Groups commonly referred to as minorities-including Asian Americans, Pacific Islanders, African Americans, Hispanics, American Indians, and Alaska Natives-are the fastest growing segments of the population and emerging as the nation's majority. Despite the rapid growth of racial and ethnic minority groups, their representation among the nation's health professionals has grown only modestly in the past 25 years. This alarming disparity has prompted the recent creation of initiatives to increase diversity in health professions. In the Nation's Compelling Interest considers the benefits of greater racial and ethnic diversity, and identifies institutional and policy-level mechanisms to garner broad support among health professions leaders, community members, and other key stakeholders to implement these strategies. Assessing the potential benefits of greater racial and ethnic diversity among health professionals will improve the access to and quality of healthcare for all Americans.
