Youth Violence Aug 26 2019 Youth violence: Sources and solutions in South Africa thoroughly and carefully reviews the evidence for risk and protective factors that influence the likelihood of young people acting aggressively. Layers of understanding are built by viewing the problem from a multitude of perspectives, including the current situation in which South African youth are growing up, perspectives from developmental psychology, the influences of race, class and gender,

and of the media. The book then reviews the evidence for effective interventions in the contexts of young people's lives – their homes, their schools, their leisure activities, with gangs, in the criminal justice system, in cities and neighbourhoods, and with sexual offenders. In doing so, thoughtful suggestions are made for keeping an evidence-based perspective while (necessarily) adapting interventions for developing world contexts, such as South Africa. *Youth violence in South Africa: Sources and solutions* is a valuable addition to the library of anyone who has ever wondered about youth violence, or wanted to do something about it.

Moving From Spoken to Written Language With ELLs Dec 11 2020 Mastering spoken language is the key to writing success for English Language Learning ELLs struggle to meet the writing demands of the Common Core State Standards. In this book, ELL expert Ivannia Soto demonstrates how oral language development is the key to building writing skills. She offers educators a powerful set of tools for implementation at both classroom and policy levels, including: • Exciting spoken techniques such as Socratic Seminar, Frayer model and Think-Pair-Share that build vocabulary and extend into academic writing • Approaches to teaching three essential styles of writing: argumentative, procedural, and narrative • Sample lesson plans and graphic organizer templates

Design for Manufacturability Aug 07 2020 *Design for Manufacturability: How to Use Concurrent Engineering to Rapidly Develop Low-Cost, High-Quality Products for Lean Production* shows how to use concurrent engineering teams to design products for all aspects of manufacturing with the lowest cost, the highest quality, and the quickest time to stable production. Extending the concepts of design for manufacturability to an advanced product development model, the book explains how to simultaneously make major improvements in all these product development goals, while enabling effective implementation of Lean Production and quality programs. Illustrating how to make the most of lessons learned from previous projects, the book proposes numerous improvements to current product development practices, education, and management. It outlines effective procedures to standardize parts and materials, save time and money with off-the-shelf parts, and implement a standardization program. It also spells out how to work with the purchasing department early on to select parts and materials that maximize quality and availability while minimizing part lead-times and ensuring desired functionality. Describes how to design families of products for Lean Production, build-to-order, and mass customization Emphasizes the importance of quantifying all product and overhead costs and then provides easy ways to quantify total cost Details dozens of design guidelines for product design, including assembly, fastening, test, repair, and maintenance Presents numerous design guidelines for designing parts for manufacturability Shows how to design in quality and reliability with many quality guidelines and sections on mistake-proofing (poka-yoke) Describing how to design parts

for optimal manufacturability and compatibility with factory processes, the book provides a big picture perspective that emphasizes designing for the lowest total cost and time to stable production. After reading this book you will understand how to reduce total costs, ramp up quickly to volume production without delays or extra cost, and be able to scale up production rapidly so as not to limit growth.

Facilitating Teacher Teams and Authentic PLCs: The Human Side of Leading People, Protocols, and Practices May 28 2022 As professional learning communities become more widespread, educators have learned that they can't simply form grade-level or subject-area teams and call it a day. To profoundly affect teacher practice and student learning, PLCs need strong and knowledgeable leadership. In *Facilitating Teacher Teams and Authentic PLCs*, Daniel R. Venables draws on his extensive experience helping schools and districts implement effective PLCs to explore this crucial but often-overlooked need. Taking a two-pronged approach to PLC facilitation, Venables offers targeted guidance both for leading the people in teacher teams and for facilitating their work. This practical resource provides Strategies for facilitating interactions among colleagues in PLCs and building trust and buy-in. Field-tested, user-friendly protocols to focus and deepen team discussions around texts, data, teacher and student work, teacher dilemmas, and collaborative planning time. Tips for anticipating and addressing interpersonal conflicts and obstacles that commonly arise during use of protocols. Current and prospective PLC facilitators at every grade level will find this book an essential guide to navigating the challenging and rewarding endeavor of leading authentic PLCs. Build your skills, and help your team rise to the next level.

How to Make it Big in the Seminar Business Jan 24 2022 *How to Make It Big in the Seminar Business* is considered must have reading among consultants, speakers, and seminar leaders. Fully updated and revised, this new edition is packed with insider tips on determining fees, marketing, scheduling, presentation technologies, and much more. It features new chapters on using the Web and other new technologies to deliver seminars; marketing on the Web; developing coaching services in conjunction with seminars; and E-mail newsletters. Readers get a fully updated and expanded directory--listing the names, addresses, and telephone numbers for hundreds of public seminar companies, corporate training companies, speakers bureaus, and seminar websites.

Storytelling for Sustainability in Higher Education Nov 21 2021 To be a storyteller is an incredible position from which to influence hearts and minds, and each one of us has the capacity to utilise storytelling for a sustainable future. This book offers unique and powerful insights into how stories and storytelling can be utilised within higher education to support sustainability literacy. Stories can shape our perspective of the world around us and how we interact with it, and this is where storytelling becomes a useful tool for facilitating understanding of sustainability concepts which tend to be complex and multifaceted. The craft of storytelling is as old as time and has influenced human experience throughout the ages. The conscious use of storytelling in higher education is likewise not new, although less prevalent in certain academic disciplines; what this book offers is the opportunity to delve into the concept of storytelling as an educational tool regardless of and beyond the boundaries of subject area. Written by academics and storytellers, the book is based on the authors' own experiences of using stories within teaching, from a story of "the Ecology of Law" to the exploration of sustainability in accounting and finance via contemporary cinema. Practical advice in each chapter ensures that ideas may be put into practice with ease. In addition to examples from the classroom, the book also explores wider uses of storytelling for communication and sense-making and ways of assessing student storytelling work. It also offers fascinating research insights, for example in addressing the question of whether

positive utopian stories relating to climate change will have a stronger impact on changing the behaviour of readers than will dystopian stories. Everyone working as an educator should find some inspiration here for their own practice; on using storytelling and stories to co-design positive futures together with our students.

Guidelines for Teaching Contracts Jul 18 2021 What happens to your teaching business when students don't pay or don't pay on time? There aren't any rules unless you put them into place yourself. Set the rules at the first meeting because a freelance teacher's income is jeopardised when they are not paid on time, and their bills cannot be paid. And that is why you should always set payment rules from the outset. A regular income - a steady cash flow - keeps your teaching business alive. Remember, 80 per cent of businesses fail because they run out of money. Make sure you have a teaching service contract detailing your payment policies: when students are expected to pay and what happens when payment is late when customers sit before you. Teaching service contracts secure a legally sound footing for freelancers when making payment claims. It is their only legal and binding proof a teaching payment agreement exists between them and their students. In fact, should their relationship with one of their student turn sour, and they need a lawyer, the first thing they will be asked is: Do you have a contract? Contracts are simple reality checks to decide whether freelancers can work with a customer. If both sides respect the contract, they can work together. A lawyer is the best person to guarantee a contract is made correctly. On the other hand, they are expensive. For most teaching freelancers, a lawyer is a luxury they cannot afford - so a self-made contract must suffice. A self-made teaching service contract is better than none. If you have never prepared a business contract before, you may be quite daunted by the prospect of creating one. For example: § What details must be written into contracts? § What elements are usually forgotten in agreements (absenteeism, etc.)? § Situations when a lawyer must check the wording in contracts For this purpose, freelancers can use a teaching service agreement example as a basis for creating their own contracts. The contract example presented is for educational

Catalog of Federal Domestic Assistance Apr 02 2020 Identifies and describes specific government assistance opportunities such as loans, grants, counseling, and procurement contracts available under many agencies and programs.

Engaging With History in the Classroom Apr 26 2022 Engaging With History in the Classroom: The Civil War is the second in a series of middle-grade U.S. history units that focus on what it means to be an American citizen, living in a democracy that expects as much from its citizens as it provides to them. In every lesson, students are asked to step into the world of 19th-century America, to hear about and to see what was happening, to read the words of real people and to imagine their hopes, dreams, and feelings. Students also learn to question the accounts left behind and to recognize different perspectives on events that divided the nation but resulted in progress in the path to liberty for all. Resources for teachers include a running script useful as a model for guiding conceptualization as well as extensive teacher notes with practical suggestion for personalizing activities. Grades 6-8

Environmental Economics Jul 06 2020 How can we design environmental policy that achieves ambitious ecological goals without burdening society with excessive costs? How can effective international agreements, for example, on global warming, be designed? This textbook discusses issues such as these in an intelligible manner for students. The book uses little mathematical analysis, relying on verbal and graphical analysis.

Product-Focused Software Process Improvement May 04 2020 This book constitutes the refereed proceedings of the 9th International Conference on Product Focused Software Process Improvement, PROFES 2008, held in Monte Porzio Catone, Italy, in June 2008. The 31 revised full papers presented together with 4 reports on workshops and tutorials and 3 keynote addresses were carefully reviewed and selected from 61 submissions. The papers address different development modes, roles in the value chain, stakeholders' viewpoints, collaborative development, as well as economic and quality aspects. The papers are organized in topical sections on quality and measurement, cost estimation, capability and maturity models, systems and software quality, software process improvement, lessons learned and best practices, and agile software development.
