Probability, Statistical Optics, and Data Testing Feb 12 2021 Scientists and engineers in optics are increasingly confronted with problems that are of a random nature and that require a working knowledge of probability and statistics for their solution. This book develops these subjects within the context of optics, using a problem-solving approach. All methods are explicitly derived and can be traced back to three simple axioms given at the outset. This third edition contains many new applications to optical and physical phenomena, including a method of exactly estimating probability laws.

*Handbook of HER2-targeted agents in breast cancer* Aug 28 2019 ?Breast cancer is the most frequently diagnosed cancer and the leading cause of cancer death in women worldwide, accounting for nearly a quarter of the total new cancer cases each year. Of these cases, approximately 15–25% overexpress HER2, a transmembrane RTK kinase that is associated with aggressive tumor growth and poor outcomes. However, in the past decade, survival rates of patients with HER-positive breast cancer have significantly improved due to increased screening, HER2 testing, and breakthrough HER2-targeted drug therapies. Handbook of HER2-Targeted Agents in Breast Cancer provides oncologists, primary care physicians, trainees and other healthcare providers with a concise, accessible, and up-to-date survey of the field,

including a review of our current understanding of the biology of the HER2 pathway and the rationale for targeting it in early-stage and advanced breast cancer, an overview of HER2-testing, and evidence-based discussions of available HER2-targeted regimens in the adjuvant and metastatic settings.

*Real Estate Exam Prep Connecticut Broker* Dec 01 2019 NEW UPDATES FOR 2016! This is an outline-ordered comprehensive, definitive review of material included on the Connecticut General and State-only Sales portions of the licensing exam that is written in a direct, concise style with many updates for 2016. It is the ONLY book on the market for these tests that is grounded in the experience of an actual test-writer who spent years in charge of real estate test development for one of the three companies still providing real estate examinations for

commissions nationwide. The book also benefits from an "insider's" commentary on what is testable and what is just too advanced or complex for the exams. It includes a full-length 80-question general-portion sample broker test AND a full-length 40-question state-portion broker test, BOTH assembled to match actual exam "blueprints," or internal-distribution specifications. And every question comes from a pool of questions that match PSI's quality and are written to match or exceed PSI 's guidelines for style. The answer key for each includes a Diagnostic chart of strengths/weaknesses to guide further review. It is uniquely definitive and authoritative, since its author still oversees several "live" real estate licensing programs. So where other authors guess, this one KNOWS!
