Concise and readable approach includes the information you need without being overwhelming, even if you have a limited scientific background. Unique Think About questions alert you to important points and help with self-evaluation, test preparation, and review. Warning Signs boxes help you identify the pre-emptive signs of physiologic events such as strokes. Emergency Treatment boxes give step-by-step instructions to follow for emergencies such as shock, cardiac arrest, and pneumothorax. Apply Your Knowledge questions ask you to use what you've learned to predict What can go wrong with this structure or system? Ready References in the appendix provide a quick lookup for anatomic terms, conversion tables, abbreviations and acronyms, diagnostic studies and tests, and more. Key terms are listed at the beginning of each chapter and defined within the text, covering the scientific terminology you need to know. Research boxes discuss new developments, problem areas of pathophysiology, and complications associated with research. Learning objectives and bulleted chapter summaries help you focus on key concepts and information. NEW Defense/Protective Mechanisms section consolidates coverage of inflammation and healing, infection, and immunity. UPDATED chapters are reorganized with a building-block method that presents content in a more logical and systematic approach. UPDATED format for individual disorders includes 1) background, 2) pathophysiology, 3) etiology, 4) signs and symptoms, 5) diagnoses, 6) possible related complications/disorders, and 7) treatments/research. NEW! Pathophysiology of Body Systems chapters begin with a brief review of normal anatomy and physiology and show the interrelatedness and the interactions between systems. NEW authors bring a fresh and contemporary approach to the content while keeping true to the integrity of Barbara Gould's original text.

immunizations and injections, colonoscopy procedures, IV therapy, and CLIA waived tests. Consistent, meticulous study guide coverage aligns seamlessly with the main Bonewit text and all other Bonewit solution learning products. Evaluation of Competency checklists assess readers' performance versus stated objectives and performance standards. Critical thinking activities encourage readers to think outside the box and imagine what they would do in real-life situations. Laboratory assignments at the beginning of each chapter give readers a guide on each chapter's procedures, including guidelines on how many practices are required, which study guide pages correlate to the procedure, and which procedures are also in the procedural videos. Key term assessment tests readers' knowledge of the terms presented in the main text. Evaluation of Learning questions assess readers' progress and are an excellent tool to prepare for the certification exam. Practice for Competency checklists help readers practice each of their clinical skills. Pharmacology math exercises give readers a chance to practice their basic math skills in a way that relates to their future job. Chapter assignment tables at the beginning of each chapter guide readers through the textbook and study guide chapters, and provides a great tracking device for recording progress of textbook reading assignments and study guide activity assignments. NEW! Updated material aligned to most current CAAHEP and ABHES competencies ensures success and employability for today's medical assistants. NEW! Material from the chapter on nutrition is also incorporated into the accompanying study guide material. NEW! Updated content on emergency preparedness and medical records ensure readers are up-to-date on these key topics. NEW! Application to SimChart for the Medical Office where appropriate allows readers to prepare for the real world by working on Elsevier's own educational EHR. NEW! Expanded A&P key terminology sections give readers ample A&P key term practice.
