Dad's Own Housekeeping

Book Feb 02 2020 Just because you're born with a "Y" chromosome doesn't excuse you from cleaning the bathroom, especially in this day and age when time's at a premium and partners have to be, well, partners. To help men step up to the plate (and wash it) is DAD'S OWN HOUSEKEEPING BOOK, the book of everything your mother never taught you about taking care of a house. Written by a real guy, in a real guy's voice and with a direct guy-to-guy point of view, DAD'S OWN HOUSEKEEPING BOOK—in the spirit of Dad's Own Cookbook, with 270,000 copies in print—takes even the most Swiffer-challenged dad and shows him that housekeeping is no different from yard work, that if you can organize your

shop you can organize a kitchen, and if you can load a trunk you can load a dishwasher. From laundry room to attic storage, from the "Five- Minute Attack Plan: Bathroom" to the all-out assault of spring cleaning (it really does make a big difference), from mold to stains to picking-up-after-the-kids-without-driving-yourself-crazy, this is the comprehensive crash course. Here's how to do the laundry without dulling colors. Stock the pantry to make weekday meals infinitely easier. How to get mildew off the shower tiles. How to make a bed—in one minute. How to be best friends with baking soda—just one of the many tips the author gives for saving money. And what you can do in thirty minutes to make your house completely presentable for your mother-in-law. Sorry,

The To-Do List Apr 29 2022

Would a proper adult ignore the spilt milk under the fridge for weeks? Would a proper adult take three years to post a solitary Christmas card? Would a proper adult have decades-old underwear in active service? Mike Gayle is nowhere near being a proper adult - even though his tenth wedding anniversary is looming; his second child is due any moment; and in less than twenty-four hours he is going to be officially closer to forty than he is to thirty. Appalled by this lack of maturity, Mike draws up a To-Do list containing every single item he's been meaning to do but just keeps putting off... He's got a lot of stuff that needs doing. But unlike previous To-Do lists, he promises himself that this one will actually get DONE. And along the way, Mike will learn stuff about life (323), love (999), friends (1004) and family (9) and finally work out what it means to be a grown up (846).

Handbook of Constraint Programming Jun 19 2021

Constraint programming is a powerful paradigm for solving combinatorial search problems that draws on a wide range of techniques from artificial intelligence, computer science, databases, programming languages, and operations research. Constraint programming is currently applied with success to many domains, such as scheduling, planning, vehicle routing, configuration, networks, and bioinformatics. The aim of this handbook is to capture the full

breadth and depth of the constraint programming field and to be encyclopedic in its scope and coverage. While there are several excellent books on constraint programming, such books necessarily focus on the main notions and techniques and cannot cover also extensions, applications, and languages. The handbook gives a reasonably complete coverage of all these lines of work, based on constraint programming, so that a reader can have a rather precise idea of the whole field and its potential. Of course each line of work is dealt with in a survey-like style, where some details may be neglected in favor of coverage. However, the extensive bibliography of each chapter will help the interested readers to find suitable sources for the missing details. Each chapter of the handbook is intended to be a self-contained survey of a topic, and is written by one or more authors who are leading researchers in the area. The intended audience of the handbook is researchers,

graduate students, higher-year undergraduates and practitioners who wish to learn about the state-of-the-art in constraint programming. No prior knowledge about the field is necessary to be able to read the chapters and gather useful knowledge. Researchers from other fields should find in this handbook an effective way to learn about constraint programming and to possibly use some of the constraint programming concepts and techniques in their work, thus providing a means for a fruitful cross-fertilization among different research areas. The handbook is organized in two parts. The first part covers the basic foundations of constraint programming, including the history, the notion of constraint propagation, basic search methods, global constraints, tractability and computational complexity, and important issues in modeling a problem as a constraint problem. The second part covers constraint languages and solver, several useful extensions to the basic framework (such as interval

constraints, structured domains, and distributed CSPs), and successful application areas for constraint programming. - Covers the whole field of constraint programming - Survey-style chapters - Five chapters on applications

It offers users an abundance of new and upgraded features that were more than five years in the making: a gorgeous, glass-like visual overhaul; superior searching and organization tools; a multimedia and collaboration suite; and above all, a massive,

addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center
