**Achieving Balance through Efficiency** 12 2021 Those starting a career in teaching will put in an incredible amount of energy into their practice in order to learn their craft and become respected professionals. In many cases, however, this energy is not enough to survive as a teacher. Currently, 1 in 5 new teachers will leave the profession after five years. The purpose of this book is to improve the "survivability" of early career teachers by focusing on one key area: Efficiency or what is referred to as Time Management. This book will examine how teachers can become more efficient in their lesson and unit planning, classroom organization, assessment of their students, how they interact with parents, and even when they search and interview for a job. Special emphasis is placed on one of the most challenging aspects of teaching, classroom behavioral management. The underlying basis for this book is a deep belief that successfully managing time will allow teachers to create a positive balance between one's professional and personal lives. It is all too common to see time-stressed and sleep exhausted teachers lose sight of the reasons they entered teaching, eventually falling out of love with their subject and those they teach. This book will tackle head on the demands that teachers face by posing many detailed, practical solutions to time management problems in a variety of different contexts. These solutions will not only come from the author's own experience preparing New York City science students for over 25 years, but from researchers and veteran teachers and administrators who have published their findings and advice in leading educational journals. It is time to stop procrastinating, and draw upon your inner grit to create order, routines, and systems that can be used successfully in your teaching profession.

**The United States' Subnational Relations with Divided China** 01 2020 This book examines US subnational engagement in foreign relations, or paradiplomacy, with China and Taiwan from 1949 to 2020. As an alternative diplomatic history of the United States' relations with divided China, it offers an in-depth chronological and thematic discussion of state and local communities' responses to the China-Taiwan sovereignty conflict and their impact on US diplomacy. The book explains why paradiplomacy matters not only in the 'low politics' of economic and cultural cooperation, but also in the 'high politics' of diplomatic recognition. Presenting case studies of US states and cities developing policies towards divided China that paralleled, clashed or aligned with those pursued by federal agencies, it also identifies Chinese and Taiwanese objectives and strategies deployed when competing for US subnational ties. Conceptually, the book builds upon Constructivism, redefining paradiplomacy as an institutional fact, reflective of subnational identities and interests, rather than as a subnational pursuit of foreign markets, driven by objective economic forces. Featuring new empirical evidence and a novel conceptual framework for paradiplomacy, *The United States' Subnational Relations with Divided China* will be a useful resource for students and scholars of US foreign policy, the politics of China and Taiwan, paradiplomacy and international relations.
