[Volkswagen Beetles and Buses](#) Feb 09 2021 This illustrated history celebrates the 75th and 70th anniversaries of Volkswagen's two most iconic vehicles, from the first Beetles spearheaded by Ferdinand Porsche in the 1940s to the buses that became synonymous with a generation. Volkswagen is one of the most beloved brands in motoring history, thanks largely to two instantly recognizable vehicles: the Beetle (a.k.a. Bug) and the Bus. More than 23 million VW Beetles have buzzed into the world since 1945, while the VW Bus presaged the minivan by thirty-plus years. Volkswagen: Beetles and Buses examines and celebrates all aspects of the vehicles and the many cultural associations that have swirled around them for more than seven decades. The diminutive rear-engined and easily mass-produced Beetle became the most popular imported car in America during the 1960s. Its success was due to its familiar face, its wildly clever ad campaigns, and the sheer numbers produced. The equally compact yet spacious Bus (a.k.a. Kombi, Microbus, Type 2, Transporter, and simply "van") has won millions of fans around the world with its practicality, simplicity, and design. In this beautifully illustrated and authoritatively written celebration, author Russell Hayes looks back at the vehicles while focusing on the classic air-cooled VWs that ran into the late 1970s. Along the way, readers witness the Beetle and Bus at work and at play and learn about vehicle development and growing roles in popular culture, including star appearances in films like *The Love Bug*, *Little Miss Sunshine*, *Footloose*, *Fight Club*, *The Big Lebowski*, and *Fast Times at Ridgmont High*, as well as television shows like *Lost* and *Once Upon a Time* and on the covers of the Beatles' *Abbey Road* and Bob Dylan's *Freewheelin'* album. The story is brought up to date with coverage of the New Beetle and plans for the VW Buzz, a modern electric version of the iconic Microbus due in 2022. Volkswagen: Beetles and Buses deserves a place in the motoring libraries of VW owners, automotive enthusiasts, and those simply interested in pop culture. It's the ultimate illustrated history of these beloved vehicles.

[VW Beetle](#) Sep 04 2020 The VW Beetle is one of the best-loved of all classic cars, with many thousands preserved across the world, many in regular use. Over the years countless changes were introduced, together making a mid-'60s Beetle, for instance, very different from one built in the mid-'50s, or mid-'70s, despite the obvious similarities. With the aid of hundreds of color photographs, this new paperback edition of VW

*Beetle: Specification Guide 1949-1967* documents all the Beetle's specification changes and model differences during the classic period 1949-67, making it possible to determine the original specification and fittings of any Beetle from this period.

*VW Advertising Dec 07 2020* In this period Volkswagen's publicity and advertising material was among the very best issued by any motor manufacturer. Following the Beetle's launch brochures in the late 1930s, the 1950s saw extraordinarily strong artwork images from the brush of Bernd Reuters and other artists, depicting Saloon, Cabriolet and Transporter in such a way as to suggest more streamlined, spacious and powerful VWs than the reality. In the '60s the American advertising agency Doyle Dane Bernbach took over, combining stark photography with sharp, witty text and endowing the Beetle with a cult status that took production to over a million for the first time, but VW's new Type 3 and Type 4 models were failing to impress the public, and only the arrival of the Golf saved the day. Author Richard Copping has a vast collection of VW material and in this book he provides a selection of some 400 of the most striking or interesting images used by the company to sell us its products, taking in every model and variant. The accompanying text guides us through the changing styles of the publicity material as well as through the range of vehicles and thus through the story of Volkswagen in the period.

*VW Kubelwagen/Schwimmwagen (VW Type 82 Kubelwagen (1940-45) / VW Type 128/166 Schwimmwagen (1941-44) Jan 08 2021* Few war films made about the 1939-45 period are complete without sight of a boxy little Kübelwagen light utility vehicle being smartly driven by a German officer. Designed by Ferdinand Porsche and built by Volkswagen, the 'Kübel' was to the Germans what the Jeep was to the Allies and was used widely by the Wehrmacht and the Waffen-SS. When production ceased at the end of the war, 50,435 Kübelwagen had been built. Of simple but sturdy construction, the VW Type 82 Kübelwagen (which translates as 'bucket car' because of its similarity to a metal bathtub on wheels) was based closely on the legendary VW Beetle. Its winning design features included air cooled engine (the absence of a radiator meant the engine was less vulnerable to bullet damage), a light-weight, flat and smooth under-body that allowed the car to slide over the surface when its wheels were sinking into sand, mud or snow, independent suspension, portal gear hub reduction and self-locking differential. Because the body was not a load-bearing part of the structure of the vehicle it could easily be modified to special purposes. Several dozen variants of the 'Kübel' were developed and built during the war including its cousin the Schwimmwagen. The VW Type 128 and 166 Schwimmwagen (which means floating or swimming car) were amphibious four-wheel drive off-roaders. Like the Kübel, they were used widely by the Wehrmacht and the Waffen-SS during the Second World War. The Type 166 Schwimm is the most numerous mass-produced amphibious car in history (14,265 between 1942 and 1944). Erwin Komenda, Ferdinand Porsche's first car body designer, developed an all-new unitized body-tub structure for the Schwimmwagen swimming car. When crossing water a screw propeller could be lowered from the rear deck engine cover and coupled to the engine's crankshaft to provide drive. The 'Schwimm' also shared many of the Kübel's mechanicals. The appeal of the Kübel lived on long after the war's end when a derivative version, the Volkswagen Type 181, was manufactured by VW from 1968 to 1983. This was a two-wheel drive, four-door, convertible, off-road military vehicle, which had been developed for the German Army but was also sold to the civilian market as the Kurierwagen in Germany, the Trekker in the UK, the Thing in the US, and the Safari in Mexico. In recent years both the Kübel and Schwimm have acquired something of a cult status among military vehicle collectors worldwide, particularly in Europe (eg, Germany, Poland Czech Republic, Switzerland), the UK and US. There are literally dozens of Kübelwagen and Schwimmwagen enthusiast/owner/interest groups! About 150 original Type 166 Schwimmwagens remain today.

Kiley traces the company's rise from Ferdinand Porsche's original design for the Beetle, through the Nazi era, and up to the Beetle's ascendancy during the flower-power 1960s. He explores the reasons for VW's downward spiral through the 1970s and 1980s, including the devastating management blunders that led to such failed efforts as the Rabbit, Dasher, Thing, and Scirocco, and equally catastrophic marketing initiatives, culminating in the notorious "Fahrfeignugen" series of ads. Finally, drawing upon his unique access to company insiders, Kiley tells the story of how Volkswagen achieved its phenomenal comeback beginning in the late 1990s through a combination of visionary management, cutting-edge product development, and brilliant marketing and advertising strategies. David Kiley (Anne Arbor, MI), the Detroit Bureau Chief at USA Today, is a journalist with fifteen years of experience, ten of which have been devoted to covering the auto industry. *The VW Camper Van Jul 02 2020 It was invented immediately after the war, in the factory a far-sighted English military man had set up to turn the German economy from making machines of warfare to more pacific products. By the seventies that dream had been amply fulfilled, as the VW Campervan became the conveyance of choice for West Coast hippies, Australian surf bums and Europeans taking the overland route to find enlightenment and good karma in India. It had also become – indeed, still is – the first choice for any couple, or family, seeking a cheap camping holiday with wheels attached. So never mind the oddly off-centre driving wheel, the vagaries of the aircooled rear engine – the VW Campervan had become more than a vehicle – it had truly become a way of life. Mike Harding's first ride in a Volkswagen Camper Van was back in 1961, when it was the carrying around the gear and bandmembers of his rock band the Manchester Rainmakers. Finally, in 2009, he could wait no longer, and bought his own, a 2001 Type 2 bay window Brazilian import Danbury conversion in hot orange and off white. Add in the endless curiosity of the author of eight monographs on church architecture, and the hilarious sense of humour of one of Britain's best stand-up comics, and you have a wonderful social history of the postwar years through the prism of a single transport icon.*
