High Stakes Aug 29 2019 In 1979, Florida Seminoles opened the first tribally operated high-stakes bingo hall in North America. At the time, their annual budget stood at less than \$2 million. By 2006, net income from gaming had surpassed \$600 million. This dramatic shift from poverty to relative economic security has created tangible benefits for tribal citizens, including employment, universal health insurance, and social services. Renewed political self-governance and economic strength have reversed decades of U.S. settler-state control. At the same time, gaming has brought new dilemmas to reservation communities and triggered outside accusations that Seminoles are sacrificing their culture by embracing capitalism. In *High Stakes*, Jessica R. Cattelino tells the story of Seminoles' complex efforts to maintain politically and culturally distinct values in a time of new prosperity. Cattelino presents a vivid ethnographic account of the history and consequences of Seminole gaming. Drawing on research conducted with tribal permission, she describes casino operations, chronicles the everyday life and history of the Seminole Tribe, and shares the insights of individual Seminoles. At the same time, she unravels the complex connections among cultural difference, economic power, and political rights. Through analyses of Seminole housing, museum and language programs, legal disputes, and everyday activities, she shows how Seminoles use gaming revenue to enact their sovereignty. They do so in part, she argues, through relations of interdependency with others. *High Stakes* compels rethinking of the conditions of indigeneity, the power of money, and the meaning of sovereignty.

Grant Management: Funding for Public and Nonprofit Programs Jul 29 2019 Much more than a book on compiling grant proposals, *Grant Management: Funding for Public and Nonprofit Programs* presents grant writing in its broader organizational management framework. This text takes a comprehensive approach to external funding for public and nonprofit agencies. The book begins with an introduction to grants, their types, their history and their key characteristics to inform the next stage the search for funding. A key part of any management process, an entire chapter considers the purpose and approaches to evaluation that should be considered in conjunction with grant-funded programs. The book concludes with a chapter that considers the process in reverse how to go about distributing funds as a grant maker rather than a grant seeker. This text leads the reader through the technical steps of preparing an application, explaining the process used to make decisions, key aspects of grant management, and includes a summary of important factors directly pertaining to grant funds. Written from the perspective of community development, With information drawn from core theories and tools of public administration, *Grant Management: Funding for Public and Nonprofit Programs* addresses overarching theoretical issues for public management as well as offers an applied perspective of grant funding and management. This is an ideal text for students and public and nonprofit managers alike.

Smart Development in Smart Communities Dec 02 2019 The concept of smart cities has become one of the most significant new lines of thinking to emerge in the social sciences in recent years, both from the research and policy angles. To date, the focus in smart specialization has been on what regions as a whole can do to bring about innovation, but it hasn't necessarily addressed the role cities play within the field.

This book aims to address that gap, drawing together a team of leading contributors, to illustrate this process with particular focus on cities. *Smart Development in Smart Communities* discusses the cross-fertilization between smart specialization and cities in fostering smart development and its interactions with the macro-, micro- and meso-economic framework, from both a theoretical and applied perspective. Specific topics covered by the book include: human capital formation and utilization; centralized/decentralized industrial policies; innovation policies; collective learning; and the role of public utilities in sustaining smart development processes. This book tackles some of the most important questions that must be faced when investigating how structural change and innovation processes are shaping local and global economic development. It will be of interest to academics and researchers in the area of Development Economics, Urban Studies and Public Management.

Art and Economics in the City Mar 05 2020 Emerging forms of alternative economic frameworks are changing the structure of society, redefining the relationship between centre and periphery, and the social dynamics in the urban fabric. In this context, the arts can play a crucial role in formulating a concept of complex and plural citizenship: This economic, social and cultural paradigm has the potential to overcome the conventional isolation of the arts and culture in ivory towers, and thereby to gradually make the urban fabric more fertile. This volume faces such sensitive issues by collating contributions from various disciplines: Economists, sociologists, urbanists, architects and creative artists offer a broad and deep assessment of urban dynamics and their visions for the years to come.

Many Thousands Gone Jul 09 2020 Today most Americans, black and white, identify slavery with cotton, the deep South, and the African-American church. But at the beginning of the nineteenth century, after almost two hundred years of African-American life in mainland North America, few slaves grew cotton, lived in the deep South, or embraced Christianity. *Many Thousands Gone* traces the evolution of black

society from the first arrivals in the early seventeenth century through the Revolution. In telling their story, Ira Berlin, a leading historian of southern and African-American life, reintegrates slaves into the history of the American working class and into the tapestry of our nation. Laboring as field hands on tobacco and rice plantations, as skilled artisans in port cities, or soldiers along the frontier, generation after generation of African Americans struggled to create a world of their own in circumstances not of their own making. In a panoramic view that stretches from the North to the Chesapeake Bay and Carolina lowcountry to the Mississippi Valley, *Many Thousands Gone* reveals the diverse forms that slavery and freedom assumed before cotton was king. We witness the transformation that occurred as the first generations of creole slaves--who worked alongside their owners, free blacks, and indentured whites--gave way to the plantation generations, whose back-breaking labor was the sole engine of their society and whose physical and linguistic isolation sustained African traditions on American soil. As the nature of the slaves' labor changed with place and time, so did the relationship between slave and master, and between slave and society. In this fresh and vivid interpretation, Berlin demonstrates that the meaning of slavery and of race itself was continually renegotiated and redefined, as the nation lurched toward political and economic independence and grappled with the Enlightenment ideals that had inspired its birth.

Agricultural Finance Oct 04 2022 This textbook integrates financial economics and management in the area of agricultural finance. The presentation of financial economics discusses how the credit needs of farmer/borrowers are met by depositors through commercial banks. The financial management content presents methods used to make farm financial decisions including farm accounting, capital budgeting, and the analysis of risk. The textbook begins by developing the farm financial market focusing primarily on the market for debt. Next, the textbook presents an overview of accounting concepts important for the credit market. The accounting section provides a detailed discussion of the Farm Financial Standards Council's suggestions for agricultural financial statements. Following the financial accounting, the book presents the use of ratio analysis applied to the farm firm. Next, the text describes capital budgeting followed by an introduction to risk analysis. Finally, the book presents the effect of debt decisions on the farm firm. In addition to the primary topics, the textbook includes a discussion of agricultural banking and monetary policy and an analysis of the choice of historical cost and market valued accounting methodologies on the farm debt decision.

Programming Creativity Sep 30 2019 What does »creativity« mean in the context of IT and what happens when IT acts in its name? Jan Sebastian Zipp examines the concept of creativity in large IT companies in times of digital change, including new ways of working or potential artificial creativity with no human interaction. Drawing on constitutive elements like Silicon Valley or its connection to counterculture, his analysis of the representation and organisation of creativity as a social practice provides insights into the inherent logic of the creativity narrative of IT. This study contributes vital foundations for a critical engagement with today's prevailing understanding of the concept of creativity.
