Remote Control Nov 05 2022 "While we all use remote controls, we understand little about their history or their impact on our daily lives. By emphasizing volume control, channel shifting, and multi-function management, they tell a story about our experience of mass media, culture, and domestic life. Remote controls reveal the deep impact electronics design has on our self-perception and world-view. This book offers lively analyses of the remote control's material, literary, and cultural history to explain how such an innocuous media accessory can change the way we occupy our houses, interact with our families, and experience the world. From the first wired radio remotes of the 1920s to infrared universal remotes, from the homemade TV controllers to the Apple Remote, remote controls shape our media devices and how we live with them"--

Remote Control Aug 10 2020 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. While we all use remote controls, we understand little about their history or their impact on our daily lives. Caetlin Benson-Allot looks back on the remote control's material and cultural history to explain how such an innocuous media accessory has changed the way we occupy our houses, interact with our families, and experience the world. From the first wired radio remotes of the 1920s to infrared universal remotes, from the homemade TV controllers to the Apple Remote, remote controls shape our media devices and how we live with them. Object Lessons is published in partnership with an essay series in The Atlantic.

Metalloproteins May 07 2020 Numerous essential biological functions involve metalloproteins; therefore, understanding metalloproteins and how to manipulate them is significant in the biological and medical fields. An examination of current research, Metalloproteins: Theory, Calculations, and Experiments explores the interplay between theory and experiment, detailing the role of theoretical modeling in the field and explaining how it aids experiments. The text also presents the current state of computational protein modeling, enabling researchers to adopt computation as an integral component of their studies. This book addresses two different aspects on metalloproteins in unison. It reviews the development of theoretical and computational methods for metalloprotein simulation with specific examples. The authors also present some of the most intriguing and important experimental results on metalloprotein systems. Although a connection can be made between these two aspects of the research, the authors do not do so explicitly. Rather, they provide the platform required to ignite further collaboration between experimentalists and theoreticians. A collection of works from top researchers in this field, the text presents diverse subjects that comprehensively reflect the current state of metalloprotein research. With these advances in structural information, theory and computation are starting to play a more significant role, particularly in identifying the reaction mechanism. The book summarizes some of the recent progress in both experiments and theory/computation showing the synergy that is now developing.

Zero Trust Networks Nov 24 2021 The perimeter defenses guarding your network perhaps are not as secure as you think. Hosts behind the firewall have no defenses of their own, so when a host in the "trusted" zone is breached, access to your data center is not far behind. That's an all-too-familiar scenario today. With this practical book, you'll learn the principles behind zero trust architecture, along with details necessary to implement it. The Zero Trust Model treats all hosts as if they're internet-facing, and considers the entire network to be compromised and hostile. By taking this approach, you'll focus on building strong authentication, authorization, and encryption throughout, while providing compartmentalized access and better operational agility. Understand how perimeter-based defenses have evolved to become the broken model we use today Explore two case studies of zero trust in production networks on the client side (Google) and on the server side (PagerDuty) Get example configuration for open source tools that you can use to build a zero trust network Learn how to migrate from a perimeter-based network to a zero trust network in production
