The Folly Nov 29 2019 A vacant patch of South African veld next to the comfortable, complacent Malgas household has been taken over by a mysterious, eccentric figure with "a plan." Filled with tools out of recycled garbage, the stranger enlists Malgas's help in clearing the land and planning his mansion. Slowly but inevitably, the stranger's charm and the novel's richly inventive language draw Malgas into "the plan" and he sees, feels and moves into the new building. Then, just as remorselessly, all that seemed solid begins to melt back into air.
The Gun Digest Book of Exploded Gun Drawings 2022 Anyone can become an expert with help from these 975 exploded and isometric long gun drawings. Professionals and hobbyists will find attention to both modern and collectible guns. Directory matches you with outlets for services and supplies.
Exploded View Nov 02 2022 It's 2050, and LAPD Detective Terri Pastuzka has drawn the short straw with her first assignment of the new decade. Someone has executed one of the city's most heinous immigrants, and no one (besides the usual besieged advocacy groups) seems to much care. Even Terri herself is already looking ahead to her next case before an unexpected development far more to this corpse than meets the eye. And a lot already meets the eye. In a city immersed in augmented reality, the LAPD have their own superior network of high-tech eyewear—Panopticon—allowing Terri instant access to files and suspects and literal insertion into the crime scene using security footage captured from every angle the day the murder occurred. When a single homicide turns into a string of unsolved murders that tie together in frightening ways, leading Terri down a rabbit hole through Los Angeles's conflicting realities—augmented and virtual, fantastically rumored and harrowingly true—towards an impossible conclusion. Exploded View is the story of a city frozen in crisis, haunted by hardship and overwhelmed by refugees, who gives everyday citizens the power to digitally reshape news in real time, and where hard video evidence is impotent against the sheer, unrelenting power of belief. After all, when anyone can see a version of the truth, what use is any other reality? Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction, opera, time travel, hard SF, alien invasion, near-future dystopia, fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.
Hard To Do Jul 18 2021 From Jane Austen to Taylor Swift, a look at the surprising politics of romantic love and its dissolution. Whatever the underlying motives – be they love, financial security, or masochism – the fact is that getting involved in a romantic partnership is emotionally, morally, and even politically fraught. In Hard To Do, Kelli Maria Korducki turns a Marxist lens on the short history of romantic partnership, tracing how the socio-economic dynamics between men and women have transformed the ways women conceive of domestic partnership. With period insights on the ways marriage and divorce are legislated, the rituals of twentieth-century courtship, and contemporary practices for calling it off, Korducki reveals that, for all women, choosing a relationship is a radical action with very limited cultural precedent.
In Love with Art Apr 14 2021 In a partnership spanning four decades, Francoise Mouly and Art Spiegelman have been the pre-eminent power couple of cutting-edge graphic art. The Day the Universe Exploded My Head Oct 10 2021 Hang on tight for a raucous bounce through the solar system and back -- propelled by funny, fanciful, factually sound poems and exuberant illustrations. The universe poured into me. My brain was overloaded. It smoked and glowed red-hot. And then it actually exploded. Ever wonder what the sun has to say about being the center of the Earth? Or what Pluto has gotten up to since being demoted to a dwarf planet? Or where rocket ships go when they retire? Listen closely, because maybe, just maybe, your head will explode. This poetry that is equal parts accurate and entertaining -- and illustrations that are positively out of this world -- this book will enthrall amateur stargazers and budding astrophysicists as it takes you on our universe holds. Space travelers in search of more information will find notes about the poems, a glossary, and a list of resources at the end.

Suez Deconstructed Dec 11 2020 Experiencing a major crisis from different viewpoints, step by step The Suez crisis of 1956—now little more than dim history for many people—offers a masterpiece of statecraft. It was a potentially explosive Middle East confrontation capped by a surprise move that reshaped the region for years to come. It was a diplomatic crisis that riveted the world. It was a short but startling war that ended in unexpected ways for every country involved. Six countries, including two superpowers, had major roles, but each saw the situation differently. In the next, it could be hard to tell which state was really driving the action. As in any good ensemble, all the actors had pivotal parts to play. Like an illustration that uses an exploded view to show how it works, this book uses an unprecedented design to deconstruct the Suez crisis. The story is broken down into three distinct phases. In each phase, the reader sees the issues perceived by each country involved, taking into account different types of information and diverse characteristics of each leader and that leader's unique perspectives. Then, after each phase is over, editorial observations invite the reader to consider the interplay. Developed by an unusual group of veteran policy practitioners and historians working as a team, Suez Deconstructed provides a way to understand the history of a major world crisis. Whether one's primary interest is statecraft or history, this study provides a fascinating step-by-step experience, repeatedly shifting from one perspective to another. At each stage, readers can gain rare experience in the way these very human leaders sized up their situations, defined and redefined their problems, improvised diplomatic or military solutions, and sought ways to influence each other, and tried to change the course of history.
Where Tomorrows Aren't Promised Oct 28 2019 From iconic NBA All-Star Carmelo Anthony comes a New York Times bestselling memoir about growing up in the housing projects of Red Hook, Brooklyn, and Baltimore—a brutal world where Tomorrows Aren't Promised. For a long time, Carmelo Anthony's world wasn't any larger than the view of the hoopsters and hustlers he watched from the streets. His family's first-floor project apartment in Red Hook, Brooklyn. He couldn't dream any bigger than emulating his older brothers and cousin, much less going on to become a basketball champion. He faced palpable dangers growing up in the housing projects of Red Hook and West Baltimore's Murphy Homes (a.k.a. Murder Homes, subject of HBO's The Wire). He navigated a broken education system that ignored, exploited, or ostracized him. He suffered the untimely deaths of his closely held loved ones. He struggled to survive physically and emotionally. But with the guidance of his family and the guidance of key mentors on the streets and on the court, he pushed past lethal odds to endure and thrive. By the time Carmelo found himself at the NBA Draft at Madison Square Garden in 2003 preparing to embark on his legendary career, he wondered: How did a kid who'd had so many hopes, dreams, and expectations beaten out of him by a world of violence, poverty, and despair end up here at all? Carmelo's story is one of strength and determination; of dribbling past players bigger and tougher than him, while also weaving around vial caps and needles strewn across the court.

dealers and junkies lined one side of the asphalt and kids playing jacks and Double Dutch lined the other: where rims had no nets, and you better not call a foul—a place Where Tomorrow Promised.

[Becoming Leonardo](#) Jun 28 2022 A Wall Street Journal Book of the Year A Spectator Book of the Year "A truly intimate portrait of one of the greatest creators in human history," this biography of Leonardo da Vinci "has the pace, elegance, and authorial omnipresence of a novel," bringing both artist and Renaissance Italy to life (Noah Charney, author of *The Art of Forgery*) Why did Leonardo da Vinci leave so many of his major works uncompleted? Why did this resolute pacifist build war machines for the notorious Borgias? Why did he carry the Mona Lisa with him everywhere for decades, yet never quite finish it? Why did he write backwards, and was he really at war with Michelangelo? And was he gay? In a book unlike anything ever written about the Renaissance, Lankford brilliantly captures Da Vinci's life as the compelling and dangerous adventure it seems to have actually been—fleeing from one sanctuary to the next, somehow surviving in war with his friend Machiavelli, struggling to make art his way or no way at all . . . and often paying dearly for those decisions. It is a thrilling and absorbing journey into the life of a ferociously dedicated artist in one way or another represents his noble rebellion, providing inspiration that is timeless.

[The Exploded View](#) Jul 30 2022 The Exploded View, from the masterful South African novelist Ivan Vladislavi?, tells the story of four lives intertwined through the sprawling infrastructure of the margins of Johannesburg: a statistician taking the national census, an engineer out on the town with city officials, an artist interested in genocide, and a contractor who puts up billboards and signs. Arcing across distance and time, Vladislavi? deftly explodes our comfortable views and brings us behind the curtains of the city while subtly expanding our notions of what is possible.

[Creo Parametric 4.0 for Designers](#), 4th Edition 2019 Creo Parametric 4.0 for Designers book is written to help the readers effectively use the modeling and assembly tools by utilizing the approach of Creo Parametric 4.0 effectively. This book provides detailed description of the tools that are commonly used in modeling, assembly, sheetmetal as well as in mold. This book also covers the latest surfacing techniques like Freestyle and Style with the help of relevant examples and illustrations. The Creo Parametric 4.0 for Designers book further elaborates on the procedure of creating drawings of a model or assembly, which are used for documentation of a model or assembly. The examples and tutorials used in this book will ensure that the users can relate the knowledge with the actual mechanical industry designs. Every chapter begins with a tools section that provides a brief information of the Creo Parametric tools. This approach allows the user to use the software as a learning tool and then as a reference material. Salient Features: Consists of 16 chapters that are organized in a pedagogical sequence. Comprehensive coverage of concepts and techniques. Step-by-step approach to explain the concepts. Detailed explanation of all commands and tools. Summarized content on the first page of the topics that are covered in the chapter. Hundreds of illustrations to aid understanding of concepts. Step-by-step instructions that guide the users through the learning process. More than 40 real-world mechanical engineering designs as tutorials, 40 as exercises with step-by-step explanation. [Hiroshima](#) Oct 09 2020 Hiroshima is the story of six people—a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest—who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey returns back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

[Exploded View](#) War 02 2020 The Cold War, police actions, superpower skirmishes, and outright conventional warfare delivered at least 100 million assault rifles to hot spots throughout the world. Terrorists, legitimate rebels to oppressive regimes, local militias, and individuals confiscated many of those weapons for their own use. Fanatics obtained these weapons though legal and illegal means. Their ability to re-purpose weapons for their causes is a major problem for lawful governments. In the past, black market arms were limited to hand guns, rocket-propelled grenades, and assault rifles. Lately, more powerful explosives, handheld anti-aircraft missiles, and biological weapons have found their way to extremists. Today, religious fanatics have access to drones, depleted uranium, and radioactive materials. It's only a matter of time before they find a supplier for weapons-grade uranium or plutonium. Building a nuclear weapon is not too difficult if one has the materials. Designing and its intended target is a challenge. Stopping it from detonating will be a daunting task once it is delivered. The presence of one or two atomic bombs onboard a ship can ruin a tropical cruise. The ship and his nephew, Chad, are on a journey to Sydney, Australia, on the largest most luxurious cruise ship ever built. Fred wants to show Chad where he spent R&R from the war in Vietnam but Chad became a POW. The well publicized maiden voyage of the Hollywood Stars Cruise Liner Marilyn Monroe has given the Islamic State time to plan the ship's hijacking. Terrorists bring with them assault rifles, weapons, AK-47s, pistols, combat knives, a GPS spoofer, computer technology, cutting edge walkie-talkies, and detailed plans on how to control the ship. They are a formidable squad of commandos. Jihadis. A ragtag group of passengers and ship's crew take exception to the terrorists' designs. In the balance lies the fate of the ship and 3000 passengers and crew, if not the world.

[The Trouble with Brunch](#) Oct 21 2021 What do your Eggs Benedict say about your notions of class? Every weekend, in cities around the world, bleary-eyed diners wait in line to be served on increasingly outré food by hungover waitstaff. For some, the ritual we call brunch is a beloved pastime; for others, a bedeviling waste of time. But what does its popularity say about shifting class boundaries towards social status and leisure? In some ways, brunch and other forms of conspicuous consumption have blinded us to ever-more-precarious employment conditions. For award-winning urbanist Shawn Micallef, brunch is a way to look more closely at the nature of work itself and a catalyst for solidarity among the so-called creative class. Drawing on theories from Thorstein Bunde Veblen, Richard Florida, Micallef traces his own journey from the rust belt to a cosmopolitan city where the evolving middle class he joined was oblivious to its own instability and insularity. The Trouble with Brunch is a provocative analysis of foodie obsession and status anxiety, but it's also a call to reset our class consciousness. The real trouble with brunch isn't so much bad service and out-of-control portions, it's that brunch could be so much more.

[On Nostalgia](#) Aug 19 2021 From Mad Men to MAGA: how nostalgia came to be and why we are so eager to indulge it. From movies to politics, social media posts to the targeted ads between them, nostalgia is one of the most potent forces of our era. On Nostalgia is a panoramic cultural history of nostalgia, exploring how a force that started as a psychological diagnosis of soldiers' homesickness has become a quintessentially modern condition. Drawing on everything from the modern science of memory to the romantic ideals of advertising, and traversing cultural movements from futurism to fascism to Facebook, cultural critic David Berry examines how the relentless search for self and overwhelming presence of mass media stokes the fires of nostalgia, making it difficult to pin down. Holding fast against the pull of the past while trying to understand what makes the fundamental impossibility of return so appealing, On Nostalgia explores what it is, how it works, and how the universal yearning is used by us and against us, and it considers a future where the past is more readily available and easier to lose track of than ever before. "If nostalgia is the Good Old Days, then David Berry's cogently argued, intelligent, and witty book should be prescribed reading for anyone wishing to understand what sometimes feels like a peculiarly modern epidemic of our current times." —Travis Elborough "We're so lucky to have a writer as thoughtful, funny, smart, and cutting as David Berry. Nostalgia dictates so much of our world, and this book is a better cataloger, critic, and guide through it than Berry." —Scaachi Koul

[The Inspection House](#) May 16 2021 In 1787, British philosopher and social reformer Jeremy Bentham conceived of the panopticon, a ring of cells observed by a central watchtower, as a labor-saving device for those in authority. While Bentham's design was ostensibly for a prison, he believed that any number of places that require supervision—factories, poorhouses, hospitals, and schools—could benefit from such a design. The French philosopher Michel Foucault took Bentham at his word. In his groundbreaking 1975 study, *Discipline and Punish*, the panopticon became a metaphor for the creeping effects of personalized surveillance as a means for ever-finer mechanisms of control. Forty years later, the available tools of scrutiny, supervision, and discipline are far more powerful and insidious than Foucault dreamed, and yet less effective than Bentham hoped. Shopping malls, container ports, terrorist holding cells, and social networks all bristle with cameras, sensors, and microphones. But, crucially, they are also rife with resistance and prime opportunities for revolution. The Inspection House is a tour through several of these sites—from Guantánamo Bay to the Occupy movement and the authors' own mobile devices—providing a stark, vivid portrait of our contemporary surveillance state and its opponents. Tim Maly is a regular contributor to *Wired*, *the Atlantic*, and *the New York Times*. Omnivore and is a 2014 fellow at Harvard University's Metalab. Emily Horne is the designer and photographer of the webcomic *A Softer World*.

[You Only Live Twice](#) Aug 07 2020 "Chase Joyn't and Mike Hoolboom here give each other the gift so many people only dream of: ample, unhurried space to unspool crucial stories of one's life. Chase is attentive, impassioned, invested, intelligent receiver on the other side. The gift to the reader is both the example of their exchange, and the nuanced, idiosyncratic, finely rendered examination of their biopolitical experiences which, in many ways, define our times. I'm so glad they have each other, and that we have this." - Maggie Nelson "You Only Live Twice is an intelligent ode to enmeshed lives and the possibilities that arise in their 'second lives' when all past expectations have been foreclosed." - Chris Kraus "The writing is out of the park — strong and surprising, a relay race of brilliant observations, tossing thoughts back and forth like balletic rugby bros. Joyn't and Hoolboom's dances of disclosure are so courageous and generative, gifts to us all." - John Greyson "What if it's not true? What if you only live once? In this genre-transcending work of true fiction, trans writer and media artist Chase Joyn't and HIV-positive movie artist Mike Hoolboom come together over the films of Chris Molyneux to exchange transition tales: confessional missives that map out the particularities of what they call "second lives": Chase's transition from female to male and Mike's near-death from AIDS in 1987.

Chronicling reactions from friends and families, medical mechanics, and different versions of "coming out," YOLT explores art, love, sex, death, and life in changed bodies. The unspoken promise that in our second life we would become the question to every answer, jumping across borders until they finally dissolved. Man and woman. Queer and straight. Mike Hoolboom is an author and filmmaker based in Toronto. He has written four books, received more than thirty international film prizes, and enjoyed nine international retrospectives of his work. Chase Joynt is a Toronto-based moving-image artist and writer who has exhibited his work internationally. He recently received a Mellon Fellowship in Arts Practice and Scholarship at the University of Chicago.

Krakatoa May 04 2020 Simon Winchester's brilliant chronicle of the destruction of the Indonesian island of Krakatoa in 1883 charts the birth of our modern world. He tells the story of the genius who beat Darwin to the discovery of evolution; of Samuel Morse, his code and how rubber allowed the world to talk; of Alfred Wegener, the crack-pot German explorer and father of tectonics; and in breathtaking detail he describes how one island and its inhabitants were blasted out of existence and how colonial society was turned upside-down in a cataclysm whose echoes are still felt today.

Haircuts by Children, and Other Evidence for a New Social Contract April 22 2020 We live in an "adultitarian" state, where the rules are based on very adult priorities and understandings of reality. Young people are disenfranchised and powerless; they understand they're subject to an authoritarian regime, whether they buy into it or not. But their unique perspectives also offer incredible engagement and innovation. Cultural planner and performance director Darren O'Donnell has been collaborating with children for years through his theatre company, Mammalian Diving Reflex. This is the most well-known piece, Haircuts by Children (exactly what it sounds like) has been performed internationally. O'Donnell suggests that that working with children in the cultural industries is a practice that maintains a large space for their participation can be understood as a pilot for a vision of a very different role for young people in the world – one that the UN Committee on the Rights of the Child considers a "new social contract." Seen and Heard is a practical proposal for the inclusion of children in as many realms as possible, not only as an expression of their rights, but as a way to disrupt the world and to disrupt the stark economic inequalities perpetuated by the status quo. Deeply practical and wildly whimsical, Seen and Heard might actually make total sense. Darren O'Donnell is an urban cultural planner, novelist, essayist, playwright, director, designer, performer, and the artistic director of the Mammalian Diving Reflex theater company. O'Donnell currently resides in Toronto, Ontario.

Gods of the Hammer Sep 19 2021 In the late 1970s and early 1980s, no Canadian band rocked harder, louder or to more hardcore fans than Teenage Head. This high-energy quartet – consisting of four guys who'd known each other since high school – were a balls-to-the-walls sonic assault. And they almost became world-famous. Almost. This is their story, told for the first time.

Disfigured Feb 22 2022 A CBC BOOKS BEST NONFICTION OF 2020 AN ENTROPY MAGAZINE BEST NONFICTION 2020/21 A NEW YORK PUBLIC LIBRARY BOOK OF THE DAY (07/23/2022) Fairy tales shape how we see the world, so what happens when you identify more with the Beast than Beauty? If every disabled character is mocked and mistreated, how do we imagine a happily-ever-after? Amanda Leduc looks at fairy tales from the Brothers Grimm to Disney, showing us how they influence our expectations and behaviour and linking the quest for rights to new kinds of stories that celebrate difference. "Historically we have associated the disabled body image and disabled life with an unhappy ending" – Sue Carter, Toronto Star "Leduc illustrates the power of stories to affect reality in this painstakingly researched and provocative study that invites us to consider our favorite folktales from another angle." – Sara Shreve, The Washington Post "She [Leduc] argues that template is how society continues to treat the disabled: rather than making the world accessible for everyone, the disabled are often asked to adapt to inaccessible spaces." – Ryan Porter, Quill & Quire "Read this smart, tenacious book." – The Washington Post "A brilliant young critic named Amanda Leduc explores this pernicious power of language in her new book, Disfigured ... Leduc follows the bread crumbs back into her original experience with fairy tales – and then explores their residual effects ... Read this smart, tenacious book." – The Washington Post "Leduc investigates the intersection between disability and her beloved fairy tales, questioning the constructs of these stories and where her place is, as a disabled woman, among those narratives." – The Globe and Mail "It gave me goosebumps as I read, to see so many of my unexpressed, half-formed thoughts in print. My highlighter got a good workout." – BookRiot "Disfigured is not just an eye-opening book, it comes to the Disney princess crew and the Marvel universe – this thin volume provides the tools to change how readers engage with other kinds of popular media, from horror films to TV shows to outdated sitcom jokes." – Quill & Quire "It's an essential read for anyone who loves fairy tales." – BuzzFeed Books "Leduc makes one thing clear and beautifully so – fairy tales are fundamentally fantastic, but that doesn't mean that they are beyond reproach in their depiction of real issues and identities." – Shrapnel Magazine "As Leduc takes us through these fairy tales and the spaces between them in the narratives that we construct, she slowly unfolds a call-to-action: the claiming of space for disability in storytelling." – The Globe and Mail "A provocative beginning to a thoughtful and ranging book, one which explores some of the most primal stories readers have encountered and prompts them to ponder the subtext situated there all along." – LitHub "a poignant and in-depth account of how the stories we tell shape our collective understanding of one another." – BookMarks "What happens when we allow disabled writers to tell stories of disability within fairy tales, magical and supernatural settings? It is a reimagining of the fairytale canon we need. Leduc dares to dream of a world that most stories envision is unattainable." – Bitch Media

Theatre of the Unimpressed Nov 09 2020 How dull plays are killing theatre and what we can do about it. Had I become disenchanted with the form I had once fallen so madly in love with as a pimply-faced suburban homo with braces? Maybe theatre was like an all-consuming high school infatuation that now, ten years later, I saw as the closeted balding guy with a beer gut he used to be. I was, of course those rare moments of transcendence that kept me coming back. But why did they come so few and far between? A lot of plays are dull. And one dull play, it seems, can't be fixed for good. Playwright and theatre director Jordan Tannahill takes in the spectrum of English-language drama – from the flashiest of Broadway spectacles to productions mounted in scrappy, off-the-wall theatres – to consider where lifeless plays come from and why they persist. Having travelled the globe talking to theatre artists, critics, passionate patrons and the theatrically disillusioned, Tannahill addresses what he considers the culture of 'risk aversion' paralyzing the form. Theatre of the Unimpressed is Tannahill's wry and revelatory personal reckoning with the discipline he's dedicated his life to, and a roadmap for a vital twenty-first-century theatre – one that apprehends the value of 'liveness' in our mediated age and the necessity for artistic risk and its attendant failures. In dramaturgy, programming and alternative models for producing, Tannahill aims to turn theatre from an obligation to a destination. '[Tannahill is] the poster child of a new generation of (theatre/dance?) artists for whom "interdisciplinary" is not a buzzword, but a way of life.' —J. Kelly Nestruck, Globe and Mail 'Jordan is one of the most talented and exciting playwrights in the country. His work will be a force to be reckoned with for years to come.' —Nicolas Billon, Governor General's Award-winning playwright (Fault Lines)
