Solving the Internet Jurisdiction Puzzle Jun 26 2019 Internet jurisdiction has emerged as one of the greatest and most urgent challenges online; affecting areas as diverse as e-commerce, data privacy, law enforcement, content take-downs, cloud computing, e-health, cyber security, intellectual property, freedom of speech, and cyberwar. In this innovative book, Professor Svantesson presents a vision for a new approach to Internet jurisdiction based on an extensive period of research dedicated to the topic. The book demonstrates that our current paradigm remains attached to territorial thinking that is out of sync with our modern world, especially, but not only, online. Having made the claim that our adherence to the territoriality principle is based more on habit rather than on any clear and universally accepted legal principles, Professor Svantesson advances a new jurisprudential framework for how we approach jurisdiction - a

framework that unites private, and public, international law. He also proposes several other reform initiatives aimed at equipping us to solve the Internet jurisdiction puzzle. In addition, the book provides a history of Internet jurisdiction, and challenges our traditional categorisation of different types of jurisdiction. It places Internet jurisdiction in a broader context and outlines methods for how to properly understand and work with rules of Internet jurisdiction. While Solving the Internet Jurisdiction Puzzle paints a clear picture of the concerns involved and the problems that needs to be overcome, this book is distinctly aimed at finding practical solutions anchored in a solid theoretical framework. Professor Svantesson argues that many of the Internet jurisdiction problems we face are due to a sleepwalking-like acceptance of orthodox thinking. Solving the Internet Jurisdiction Puzzle acts as a wake-up call to this issue.

Pandora's Legion Nov 04 2022 In this explosive new series from New York Times bestseller Harold Coyle and noted military author Barrett Tillman, a new type of war is being fought by private paramilitary companies at the beck and call of the highest bidder. With the military and intelligence agencies spread thin, the US is constantly calling upon the services of these organizations--and Strategic Solutions Inc. is among the best. Members of Al-Qaida have set in place a vicious biological attack. Men and women infected with the highly communicable and deadly Marburg virus have been sent to major cities and sensitive locations throughout the world in hopes of creating a deadly, global epidemic. The dedicated men and women of SSI, led by former Rear Admiral Michael Derringer, are consummate professionals, nearly all ex-police or

military, and are the among the best in the world at what they do. But the mastermind behind the living bio-weapons, Dr. Saeed Sharif, is more deadly than anyone could have possibly imagined. Spread throughout the globe and thwarting attacks on their home facilities the staff at SSI soon find themselves engaged in a frontline game of ground warfare. And to make matters worse, two infected Marburg carriers are heading straight for the United States. Using every resource it has, SSI launches an all-out search for the walking plague carriers before thousands more become infected and die. Posing a frightening scenario that could become all too real in the near future, and filled with the details of the military world that have made Coyle's books bestsellers, Pandora's Legion hits the front lines of the new war against terrorism in this engrossing, high-stakes novel. Drawdown May 30 2022 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a

textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.
