The International Steam Engineer Nov 11 2020

Mechanical Efficiency of Heat Engines Oct 11 2020 Publisher description

Steam Engine Practice Oct 03 2022 This book was written at the peak of steam engine use in 1885 and comprises almost everything an operator or engineer of such engines still has to know.

The Mechanics of Optimism Sep 09 2020 For every successful mining district celebrated in history, there were failed dozens whose stories have been largely forgotten. The Mechanics of Optimism documents, in rare detail, the boom-bust cycle of Hot Spring District, a mid-1860s Montana gold camp that did not pay, despite early predictions of a sure thing. Historian Jeffrey J. Safford examines how gold mining ventures were developed and financed during and after the Civil War, and how men, primarily Easterners with scant knowledge of mining, were willing to invest large sums in gold mines that promised quick and lucrative returns. Safford explains how these mining companies were organized and underwritten, and why a little-known district in southwestern Montana was chosen as a center of operations. Relying on extensive primary sources, Safford addresses the mind-set of the businessmen, the expectations and realities of new mining technology, the financial strategies, and the universality of the Hot Spring experience.

[The Space Economy in Figures How Space Contributes to the Global Economy](#) Apr 16 2021 The space economy is expanding and becoming increasingly global, driven by the development of ever-more governmental space programmes around the world, the multiplication of commercial actors in value chains, durable digitalisation trends, and new space systems coming of age. This report describes these emerging trends using new and internationally comparable data and indicators.

Automotive Science and Mathematics May 06 2020 An introductory text for BTEC first, BTEC national and IMI Certificate and Diploma syllabus requirements for mathematics and science. This textbook presents the necessary principles and applications with examples and exercises relating directly to motor vehicle technology and repair, making it easy for automotive students and apprentices to relate theory back to their working

practice. It also offers a good introductory text for automotive students on Higher National and Foundation degree courses in automotive engineering.
