[English Language Arts, Grade 12 Module 1](#) Sep 09 2020 Paths to College and Career Jossey-Bass and PCG Education are proud to bring the Paths to College and Career English Language Arts (ELA) curriculum and professional development resources for grades 6-12 to educators across the country. Originally developed for EngageNY and written with a focus on the shifts in instructional practice and student experiences the standards require, Paths to College and Career includes daily lesson plans, guiding questions, recommended texts, scaffolding strategies and other classroom resources. Paths to College and Career is a

concrete and practical ELA instructional program that engages students with compelling and complex texts. At each grade level, Paths to College and Career delivers a yearlong curriculum that develops all students' ability to read closely and engage in text-based discussions, build evidence-based claims and arguments, conduct research and write from sources, and expand their academic vocabulary. Paths to College and Career's instructional resources address the needs of all learners, including students with disabilities, English language learners, and gifted and talented students. This enhanced curriculum provides teachers with freshly designed Teacher Guides that make the curriculum more accessible and flexible, a Teacher Resource Book for each module that includes all of the materials educators need to manage instruction, and Student Journals that give students learning tools for each module and a single place to organize and document their learning. As the creators of the Paths ELA curriculum for grades 6-12, PCG Education provides a professional learning program that ensures the success of the curriculum. The program includes: Nationally recognized professional development from an organization that has been immersed in the new standards since their inception. Blended learning experiences for teachers and leaders that enrich and extend the learning. A train-the-trainer program that builds capacity and provides resources and individual support for embedded leaders and coaches. Paths offers schools and districts a unique approach to ensuring college and career readiness for all students, providing state-of-the-art curriculum and state-of-the-art implementation.

Using the National Gifted Education Standards for Pre-K - Grade 12 Professional Development Nov 11 2020 National teacher preparation standards in gifted and talented education provide the foundation for research-based practices in gifted education and identify what teachers should know and be able to do to ensure that students with gifts and talents realize their full potential. Because the responsibility for teaching gifted learners and those with potential to achieve at high levels is often shared between gifted education program leaders and teachers in general and special education classrooms, this book shows Pre-K-12 education leaders how to develop partnerships, identify professional development outcomes, design learning activities, plan and implement comprehensive training programs, and evaluate the effectiveness of

professional development activities. Special attention is paid to effecting change within a state and school system. Tools provided include sample needs assessments, student and teacher observation instruments, and a sample professional development plan.
