Tax Incidence and Poverty Reduction: Assessing the Effects of Taxes on Income

Distribution in Thailand Oct 31 2019 Research paper from the year 2013 in the subject Business economics - Investment and Finance, grade: None, , course: Public

Administration, language: English, abstract: This paper looks at the effects of taxes on income distribution in Thailand making use of the 2005 data from the Bureau of the Budget and other sources. We attempt to figure out if Thai tax system is pro poor or rich (i.e. progressive or regressive) among the various tax types on the five quintile income groups. This paper is used to ascertain which income group tend to pay more of their incomes as taxes. The paper also explores the relationship between tax incidence and poverty reduction on the one hand and indicators of access to education and health services and social outcomes on the other using simple measures of association. We conclude that based on the results of the tax system, the income distribution of Thai households became more equal on individual income tax, implying a gradual effort to bridge the income gap between the rich and the poor in Thailand. A pre-tax Gini coefficient of 0.3056 saw a marginal improvement, leading to a post-tax Gini coefficient of 0.2862 on post-tax (IIT), implying the situation on post-tax individual income shows an attempt by Thai government to have equality in individual incomes, and thereby bridging the income gaps. In general, the total post-tax coefficient ended at 0.3085 indicating, though efforts are being put in place by government to enhance the income situation of the poor, the effort according to our empirical results is marginal and have even worsened the income disparity situation by increasing income inequality

to another level. The result confirms the distribution of income of Thai households became more unequal, and an indicative of a tax regime which is regressive at the end. We therefore make a number of policy recommendations on the ensuing situation.

We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Learning to Love Form 1040 Sep 03 2022 No one likes paying taxes, much less the process of filing tax returns. For years, would-be reformers have advocated replacing the return-based mass income tax with a flat tax, federal sales tax, or some combination

thereof. Congress itself has commissioned studies on the feasibility of a system of exact withholding. But might the much-maligned return-based taxation method serve an important yet overlooked civic purpose? In *Learning to Love Form 1040*, Lawrence Zelenak argues that filing taxes can strengthen fiscal citizenship by prompting taxpayers to reflect on the contract they have with their government and the value—or perceived lack of value—they receive in exchange for their money. Zelenak traces the mass income tax to its origins as a means for raising revenue during World War II. Even then, debates raged over the merits of consumption-based versus income taxation, as well as whether taxes should be withheld from payroll or paid at the time of filing. The result is the income tax system we have today—a system whose maddening complexity, intended to accommodate citizens in widely different circumstances, threatens to outweigh any civic benefits. If sitcoms and political cartoons are any indication, public understanding of the income tax is badly in need of a corrective. Zelenak clears up some of the most common misconceptions and closes with suggestions for how the current system could be substantially simplified to better serve its civic purpose.

H and R Block 2000 Income Tax Guide Jan 03 2020 From the world's largest providers of tax services comes the annual guide to preparing returns--with step-by-step

guidelines for filling out forms, time- and money-saving tips, and a wealth of advice and information tailored to the needs of middle-income Americans. Up-to-date forms are provided on perforated paper. 2-color throughout. Tables and charts.

Funding the Future: Tax Revenue Mobilization in the Pacific Island Countries Jun 27

2019 Pacific Island Countries (PICs) face daunting spending needs related to achieving the UN Sustainable Development Goals (SDGs) and adapting to the effects of climate change. Boosting tax revenues will need to be an essential pillar in creating the fiscal space to meet SDG and climate-adaptation spending needs. This paper assesses the additional tax revenue that PICs could potentially collect and discusses policy options to achieve such gains. The main objectives of the paper are to (1) review the critical medium-term development spending requirements and available financing options, (2) document the main stylized facts about tax revenues in the PICs and estimate the additional tax revenue that countries could raise, (3) highlight the main bottlenecks preventing the PICs from further increasing their tax revenue collection with an emphasis on weaknesses in VAT systems, (4) draw lessons from successful emerging and developing countries that have managed to substantially and durably increased their tax revenues, and (5) propose tax policy and revenue administration reform

priorities for Pacific Island Countries to boost tax revenues. The paper's main findings are (1) The current revenue mix is skewed toward non-tax revenues, (2) PICs could collect an additional 3 percent of tax revenue in the short to medium term, (3) Many bottlenecks are preventing the PICs from boosting their tax revenue collection, and (4) The potential offered by efficient VAT systems is not fully exploited. To increase tax revenue in the Pacific Islands, the paper proposes the following reforms: (1) unwinding recent fiscal relief measures, (2) strengthening or introducing a VAT system; (3) rationalizing tax exemptions, (4) closing loopholes in the tax system, (5) reforming tax administration, and (6) introducing a medium-term revenue strategy.

The Tax System in the United States. Individual and Corporate Income Tax and State Taxes in Wisconsin May 07 2020 Seminar paper from the year 2009 in the subject Law - Tax / Fiscal Law, grade: 2,3, Cologne University of Applied Sciences (Institut für Versicherungswesen), course: Internationales Steuerrecht, language: English, abstract: The English colonists in the Massachusetts Bay Colony enacted the first income tax in 1634, but the federal government did not adapt this form of taxation until 1861. Eleven states and the Federal Union raised income tax to finance the civil war. After the civil war, there was no need for income tax and the federal government

to repeal the tax. All operations could be financed by customs duties. In 1894, a new federal income tax on individuals was enacted. The federal corporate income tax was enacted by the Congress in 1909. The U.S. Supreme Court had approved all these laws. The German Einkommensteuergesetz was enacted in 1934, the Körperschaftssteuergesetz was enacted in 1920, and the Gewerbesteuerengesetz in 1936. With the Revenue Act from 1913, the first form 1040 was due on March 1, 1914. The structure was very similar. They already had deductions and personal exemptions. The rates ranged from 2 percent to 6 percent. The 6 percent rate applied for income in excess of \$ 500,000. Nowadays the highest rate is 35 percent and applies on taxable income above \$357,700.

(Circular E), Employer's Tax Guide - Publication 15 (For Use in 2021) Jun 07 2020

Employer's Tax Guide (Circular E) - The Families First Coronavirus Response Act (FFCRA), enacted on March 18, 2020, and amended by the COVID-related Tax Relief Act of 2020, provides certain employers with tax credits that reimburse them for the cost of providing paid sick and family leave wages to their employees for leave related to COVID-19. Qualified sick and family leave wages and the related credits for qualified sick and family leave wages are only reported on employment tax returns with respect to wages paid for leave taken in quarters beginning after March 31, 2020, and before April 1, 2021, unless extended by future legislation. If you paid qualified sick and family leave wages in 2021 for 2020 leave, you will claim the credit on your 2021 employment tax return. Under the FFCRA, certain employers with fewer than 500 employees provide paid sick and family leave to employees unable to work or telework. The FFCRA required such employers to provide leave to such employees after March 31, 2020, and before January 1, 2021. Publication 15 (For use in 2021)

The Influence of Income Tax Rules on Insurance Reserves Feb 02 2020 The paper examines the effects of income tax rules on property- casualty reserving practices.
