The Christmas Encyclopedia, 3d ed. Aug 07 2020 This considerably expanded third edition of The Christmas Encyclopedia (2001) adds 281 new entries, bringing the total number of Christmas topics to more than 760. Continuing in the format of the previous editions, a wide variety of subjects are included: individual carols and songs; historical events at Christmastime; popular Christmas symbols;

Christmas plants, place names, and stamps; and celebrations in countries around the world, including the origins of some of the most cherished traditions in the United States. Unique to this work is its emphasis on Christmas as depicted in the popular media, with entries covering literary works such as *Call Me Mrs. Miracle* and *Silver Bells*, classic television series such as *Bonanza* and *Little House on the Prairie*, motion pictures such as *Arthur Christmas* and *Santa Clause 3*, and television specials expressing holiday themes.

*Sex Differences* Mar 02 2020 This volume is the first to aim at summarizing all of the scientific literature published so far regarding male-female differences and similarities, not only in behavior, but also in basic biology, physiology, health, perceptions, emotions, and attitudes. Results from over 18,000 studies have been condensed into more than 1,900 tables, with each table pertaining to a specific possible sex difference. Even research pertaining to how men and women are perceived (stereotyped) as being different is covered. Throughout this book's eleven years in preparation, no exclusions were made in terms of subject areas, cultures, time periods, or even species. The book is accompanied by a CD containing all 18,000+ references cited in the book. *Sex Differences* is a monumental resource for any researcher, student, or professional who requires an assessment of the weight of evidence that currently exists regarding any sex difference of interest. It is also suitable as a text in graduate courses pertaining to gender or human sexuality.

*Embraced* Jun 24 2019 *The Dollhouse Trilogy* concludes as Mary discovers real love and as a bonus, the true meaning of life. Even more importantly, she experiences new birth in a simple act of faith.

*Double Feature Creature Attack* Apr 02 2020 This whopping big *McFarland Classic* brings together 43 interviews with horror and science fiction movie writers, producers, directors and the men and women who saved the planet from aliens, behemoths, robots, zombies, and other sinister, stumbling threats--in the movies, at least. The interviewees reminisce about some of their great (and not so great!) films and tell their stories. This classic volume represents the union of two previous volumes: 1994's *Attack of the Monster Movie Makers* ("anecdotes are frank and revealing"--*Video Watchdog*); and 1995's *They Fought in the Creature Features* ("a fun book for all SF film enthusiasts"--*Interzone*). Together at last, this combined collection of interviews offers a candid and delightful perspective on the movies that still make audiences howl and squeal (though fear has long been replaced with sweet nostalgia).

*The Readymade Thief* Jan 24 2022 "The most must-read of all must-

reads." –Marie Claire "A kickass debut from start to finish." –Colson Whitehead, author of *The Underground Railroad* Lee Cuddy is seventeen years old and on the run. Betrayed by her family after taking the fall for a friend, Lee finds refuge in a cooperative of runaways holed up in an abandoned building they call the Crystal Castle. But the façade of the Castle conceals a far more sinister agenda, one hatched by a society of fanatical men set on decoding a series of powerful secrets hidden in plain sight. And they believe Lee holds the key to it all. Aided by Tomi, a young hacker and artist with whom she has struck a wary alliance, Lee escapes into the unmapped corners of the city—empty aquariums, deserted motels, patrolled museums, and even the homes of vacationing families. But the deeper she goes underground, the more tightly she finds herself bound in the strange web she's trying to elude. Desperate and out of options, Lee steps from the shadows to face who is after her—and why. A novel of puzzles, conspiracies, secret societies, urban exploration, art history, and a singular, indomitable heroine, *The Readymade Thief* heralds the arrival of a spellbinding and original new talent in fiction.

*Biochemical Actions of Hormones* Aug 19 2021 *Biochemical Actions of Hormones, Volume II* is a 12-chapter text that surveys the significant developments toward understanding the primary effects of hormones in cellular receptors at the molecular level. This book starts with an overview of the genetic regulation by hormones and the role of cyclic adenosine monophosphate in hormonal response. These topics are followed by discussions on the hormone-dependent molecular mechanisms, which appear to participate in the regulation of cell proliferation and differentiation in this model system, as well as how multiple hormonal signals may serve to integrate a large number of complex regulatory mechanisms. A chapter deals with the comparative aspects of the physiology and biochemistry of insulin, with an emphasis on the molecular mode of action of insulin on metabolic processes. The remaining chapters deal with the physiology, mechanism of action, and biological effects of various hormones, including catecholamines,

glucocorticoids, estrogens, progestins, gonadotropins, prolactin, adrenocorticotrophic hormone, 25-hydroxycholecalciferol, and insect hormones. Endocrinologists will find this book invaluable.

*Doctor Rat* Mar 26 2022 This World Fantasy Award winner in the vein of *Animal Farm* delves into a lab worthy of a mad Nazi scientist--but run by a brilliantly sadistic rodent. In the annals of American literature, there has never been a character quite like Doctor Rat, PhD. From one of the most indispensable storytellers in speculative fiction, this biting satire introduces a narrator of learned charm and humor, and a twisted logic that is absolutely chilling. Doctor Rat is a credit to his species. A survivor of the most refined scientific experiments, now removed from the maze, he has become a valued and productive member of the academic community. When he must administer a lethal dose, he comforts his fellow rats with his compassionate slogan: "Death is freedom." But everything changes when animals worldwide begin to rebel, refusing to accept their proper places in the natural order of things: as test subjects, pets, or food. And only Doctor Rat has the courage to defend mankind from the ungrateful animal kingdom. Hailed by the *Los Angeles Times* as "dazzlingly original" and "occasionally quite beautiful," Doctor Rat is a sly and stylish indictment of fanaticism in mice and men. "A truly imaginative impresario . . . [Doctor Rat] teases your conscience with educated wit and versatile improvisation, not to mention the casual flick of the tail about to be cut off." --Kirkus Reviews

*Current Topics in Experimental Endocrinology* Sep 19 2021 *Current Topics in Experimental Endocrinology, Volume 1* provides a review on experimental endocrinology. The book discusses the basic concepts of saturation analysis techniques; the concept of how steroid hormones might influence the differentiation of certain brain structures instrumental in the control of gonadotropin secretion; and trends in

the physiology of the posterior pituitary. The text also describes role of thymosin and other thymic factors in the development, maturation, and functions of lymphoid tissue; the chemistry and comparative chemistry of calcitonin, factors affecting its secretion and metabolic degradation, and the results of its preliminary therapeutic application in the complex situation of disordered bone metabolism found in Paget's disease. The chemical nature and the importance of the long-acting thyroid stimulator; the endocrinological implications of prostaglandins; and effects of ovarian hormones at the subcellular level are also encompassed. Endocrinologists and students taking related courses will find the book invaluable.

The Carcinogenic Effects of Polycyclic Aromatic Hydrocarbons Oct 28 2019 This book provides an overview on the molecular mode of action of carcinogenic polycyclic aromatic hydrocarbons (PAHs). PAHs are by-products arising from incomplete combustion of organic matter that are frequently released into our environment, and thus are ubiquitously detectable. Many PAHs are strong carcinogens in rodent bioassays and

have been linked to increased incidences of various types of cancer in humans. The present book covers all aspects of PAH-induced carcinogenesis; it is a collection of articles written by some of the most recognizable PAH researchers, reviewing the present knowledge in this field. The topics include: exposure to and biomonitoring of PAHs in the human population; metabolic activation of PAHs; genotoxicity and repair of PAH-induced DNA damage; and factors modulating individual susceptibility to the deleterious effects of PAHs.

Contents: Polycyclic Aromatic Hydrocarbon-Induced Carcinogenesis – An Introduction (A Luch) Metabolic Activation and Detoxification of Polycyclic Aromatic Hydrocarbons (A Luch & W M Baird) Biomonitoring of Polycyclic Aromatic Hydrocarbons – Human Exposure (A Seidel) Macromolecular Adducts as Biomarkers of Human Exposure to Polycyclic Aromatic Hydrocarbons (D H Phillips) DNA Damage and Mutagenesis Induced by Polycyclic Aromatic Hydrocarbons (A Besaratinia & G P Pfeifer) Mechanisms of Repair of Polycyclic Aromatic Hydrocarbon-Induced DNA Damage (H Naegeli & N E Geacintov) Aberrant Gene Expression and Cell Signalling/Epigenetic Effects Induced by Polycyclic Aromatic Hydrocarbons (P Steinberg) Indicator Assays for Polycyclic Aromatic Hydrocarbon-Induced Genotoxicity (H Glatt) Tumorigenicity of Polycyclic Aromatic Hydrocarbons (S Amin & K El-Bayoumy) Genetic Susceptibility to Polycyclic Aromatic Hydrocarbon-Induced Carcinogenesis (A Hirvonen) Polycyclic Aromatic Hydrocarbon-Induced Carcinogenesis – An Integrated View (A Luch) Readership: Graduate students, academics and researchers in toxicology, biochemistry, oncology and the life sciences.
