Joycean Unions Sep 21 2021 This exciting new volume presents recent research by internationally recognised Joyce scholars from Europe and North America. Entitled Joycean Unions: Post-Millennial Essays from East to West, it pays particular attention to contemporary Eastern and Western European perspectives on the immensely influential work of the Irish writer James Joyce (1882-1941). The essays collected in this volume uncover various European sources of inspiration for Joyce's early aesthetic theories, for the "Sirens", "Cyclops", "Circe" and "Eumaeus" episodes of his modernist masterwork Ulysses (1922) and for his last tour de force Finnegans Wake (1939). They present inspiring new ways of reading Joyce's work, re-investigate the fascinating phenomenon of literary "error", and review aspects of Joyce's varied afterlife in Ireland and Eastern Europe. The book will be of interest to scholars, students and the general Audience interested in English literature, Modernism, European Studies, Irish Studies and of course the works of James Joyce.

Lectures on Symplectic Geometry Apr 04 2020 The goal of these notes is to provide a fast introduction to symplectic geometry for graduate students with some knowledge of differential geometry, de Rham theory and classical Lie groups. This text addresses symplectomorphisms, local forms, contact manifolds, compatible almost complex structures, Kaehler manifolds, hamiltonian mechanics, moment maps, symplectic reduction and symplectic toric manifolds. It contains guided problems, called homework, designed to complement the exposition or extend the reader's understanding. There are by now excellent references on symplectic geometry, a subset of which is in the bibliography of this book. However, the most efficient introduction to a subject is often a short elementary treatment, and these notes attempt to serve that purpose. This text provides a taste of areas of current research and will prepare the reader to explore recent papers and extensive books on symplectic geometry where the pace is much faster. For this reprint numerous corrections and clarifications have been made, and the layout has been improved.
